

It's Your Money Tax Cut Agenda: UPDATED, 12-11-13

Since taking office, Governor Scott has insisted on a new way of doing business: the State of Florida must make decisions with Floridians' tax dollars the way Florida families would if they were sitting around their own kitchen tables. Just as families would do, Governor Scott has made decisions that respect the difficulty of earning a living.

Governor Scott's policies include cutting wasteful government spending by recommending reductions to government programs and continually evaluating state contracts to ensure the best deal for taxpayers, paying down state debt, placing money into reserve, and giving back money to taxpayers rather than simply spending state revenue because it exists.

It's Your Money, Not the Government's

Under Governor Rick Scott's leadership, Florida's economy has undergone a dramatic positive transformation in less than three years—creditable in large part to a more responsible approach to the way the State of Florida spends citizens' tax dollars.

Prior to Governor Scott taking office, Florida had lost more than 800,000 jobs in just four years, the real estate market had collapsed, and thousands of government regulations were hampering struggling businesses. To cope with the failing economy, state government borrowed from reserves while raising taxes and fees and growing state debt by around \$1 billion each year, including by \$5.2 billion in the four years prior to Governor Scott's election—a trend of borrowing that had become pervasive in Florida state government culture. (Chart B)

Chart A

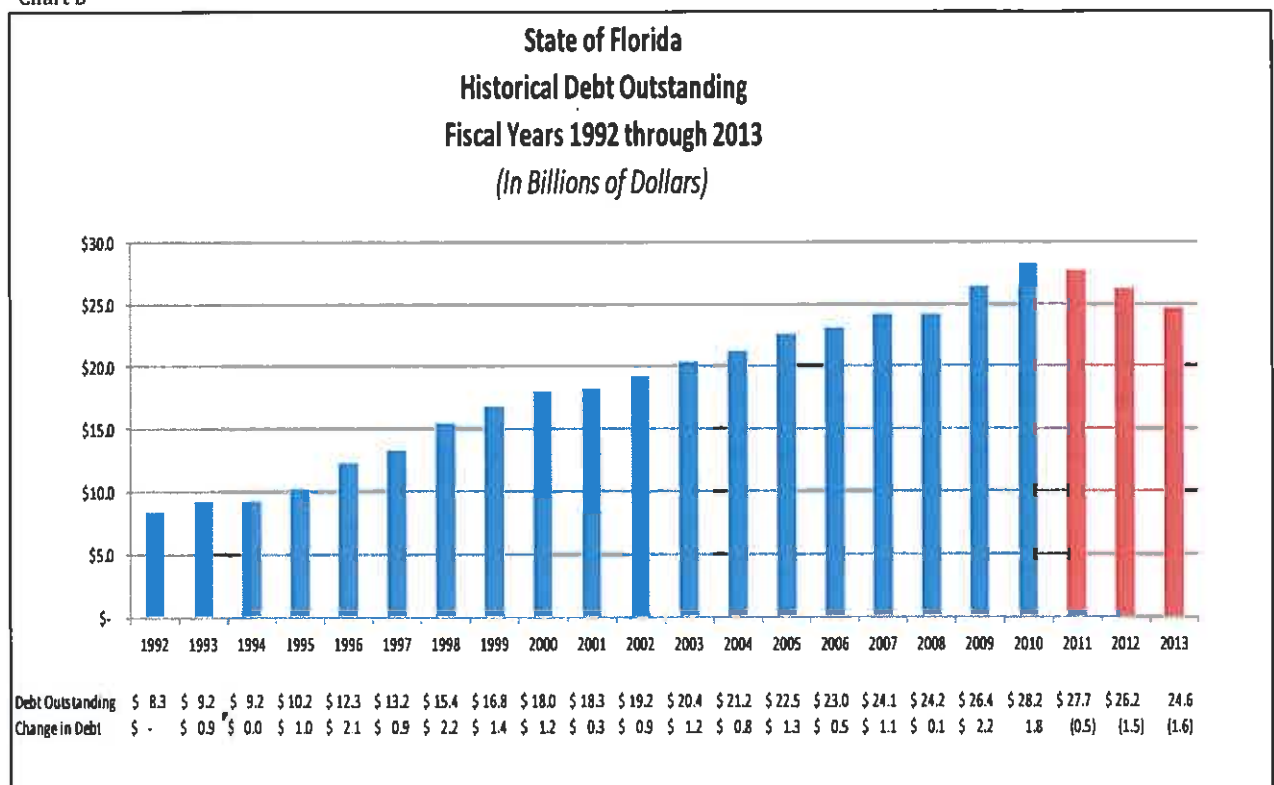

It is hard to ignore the dramatic shifts in fiscal policy that resulted from Governor Scott's tenure, and even harder to ignore the results of a growing and more dynamic economy.

Florida job creators have now created more than 440,000 jobs since the beginning of Governor Scott's term. The unemployment rate has dropped below the national average, and Florida's unemployment rate has dropped by more than any other state in the country but one, over that time period. Florida has paid down \$3.5 billion in state debt, while reducing the state government's workforce to the lowest level per capita in state history. In fact, Florida's state employee population is the lowest per capita in the United States. More than 2,800 state regulations on families and job creators have been repealed and more than \$3.5 billion in federal loans for re-employment assistance taken out during the downturn have now been paid back.

Over this period, Governor Scott and the Legislature have also been able to cut taxes 24 times (see *Appendix A*), including the elimination of the sales tax on manufacturing equipment to help jump-start manufacturing investment and property tax cuts for Florida homeowners and businesses. Currently, more than 70 percent of Florida businesses no longer have to pay the business tax.

Chart B

Division of Bond Finance – August 20, 2013

The result? In 2013, Florida saw its first budget surplus in six years, and the Revenue Estimating Conference released recent projections indicating the general revenue forecasted for Fiscal Year 2014-2015 in Florida will be the highest ever.

Why is Florida different under Governor Scott?

Under Governor Scott, the state has fundamentally changed the way it makes decisions with its taxpayers' money. Florida has rejected the short-sighted state-level policies that

worsened the fallout of the economic downturn and Florida now stands in stark contrast to the policies of the federal government that discourage private investment, job creation and stability for families.

This is how taxpayers respect their own money, and it is the approach they deserve their public servants to have as well. Governor Scott believes that taxpayer money doesn't stop belonging to Floridians when it goes into a government bank account.

Since taking office, Governor Scott has insisted on a new way of doing business: the government of the State of Florida must make decisions with Floridians' tax dollars the way Florida families would if they were sitting around their own kitchen tables. Just as families would do, Governor Scott has made decisions that respect the difficulty of earning a living. Governor Scott's policies include cutting wasteful government spending by recommending reductions to government programs and continually evaluating state contracts to ensure the best deal for taxpayers, paying down state debt, placing money into reserve, and giving back money to taxpayers rather than simply spending state revenue because it exists.

This approach is the foundation of Governor Scott's *It's Your Money Tax Cut Agenda*. The agenda, outlined below, is aimed at making decisions with Floridians' tax dollars the way they would, and is critical to continuing the job-creating, pro-growth success that Florida has already seen as a result of these policies.

It's working in Florida and to continue this positive momentum, Governor Scott proposes the following steps to ensure that government spends tax dollars the way that Floridians would.

It's Your Money Tax Cut Agenda Items

1. UPDATED: Cut \$500 Million in Taxes and Fees

Governor Scott will return \$500 million to Florida taxpayers in reduced taxes and fees in his proposed FY 2014-2015 budget.

- **UPDATED: Around \$400 million dedicated to the elimination of the 2009 automobile tax/fee increases on Florida families**

The State Revenue Estimating Conference announced that the general revenue forecasted for 2014-2015 in Florida will be the highest ever. Governor Scott believes that more revenue into the state means government must return more tax dollars to the hardworking people of Florida. That's why Governor Scott is working with the Florida Legislature to cut Floridians' taxes and fees by half a billion dollars—\$500 million—in his proposed FY 2014-2015 budget.

Governor Scott will propose a budget that eliminates the 2009 automobile tax/fee increases on Florida families, saving Floridians an estimated total of around \$401 million. Specifically, partnering with the Florida legislature, he will roll back the increases related to the annual registration of motor vehicles, returning those taxes to their pre-2009 levels, effective September 1, 2014. The resulting tax cut would amount to a decrease of over \$25 for the registration of a typical automobile totaling \$401 million annually.

In 2009, Floridians experienced significant increases in various taxes related to the annual registration of motor vehicles, increasing the cost of registering a typical motor vehicle by an average of 54 percent. As a result, the cost of registering a typical automobile increased

from an estimated \$46.80 to \$71.85 every year. Combined with increases in driver license fees and various service charges, the increases translated to state revenues of over \$1 billion, which were directed primarily to General Revenue.

Governor Scott's proposed tax/fee automobile roll back would offer relief to the millions of taxpayers who pay these taxes/fees on over 13 million annual registrations each year, returning to pre-2009 levels. (*Appendix B* illustrates the projected savings for each typical automobile registered by a Florida family.)

As Governor Scott prepares to release his recommended budget in January 2014, further details will be available to meet the remainder of the Governor's goal of cutting \$500 million in tax and fees.

Working with the Florida Legislature, Governor Scott cut taxes year after year, even while forcing government to live within its means. Governor Scott and the Legislature have enacted numerous tax cuts over the past three years, including: the elimination of the sales tax on manufacturing equipment to help jump-start manufacturing investment; continuing to roll back the business tax, so that today around 70 percent of our businesses no longer pay it; and a property tax cut for homeowners and businesses.

Cutting taxes, right-sizing government, and reducing regulations means businesses have the support they need to create jobs for Florida families.

2. Reduce State Debt

Governor Scott will not allow the state to commit to any long-term debt obligations that do not yield a specific return on investment or internal rate of return.

Traditionally, the State of Florida has grown long-term debt obligations each year by maximizing all available bonding capacity to fund projects like roads, land acquisitions and education facility construction. Outstanding state debt increased annually and more than tripled from 1992 through 2010 before decreasing in each of the past three fiscal years, reversing a long-term trend of near billion-dollar annual increases. Specifically, this debt has been reduced by a total of \$3.5 billion over the past three fiscal years from \$28.2 billion in 2010 to \$24.6 billion in 2013, including a reduction of \$1.6 billion over the last fiscal year. The decrease in debt during 2013 is primarily due to payments of principal exceeding new debt issuance during the year. At a time when Fitch Ratings has placed the United States credit rating on negative watch, they have conversely, revised Florida's outlook from negative to stable. *Because of responsible business practices under Governor Scott's leadership, he will be the first Governor in Florida history to end a term with less public debt outstanding than existed when he was elected.*

To continue this practice of guarding taxpayer debt obligations, Governor Scott will not allow the State of Florida to take on new long-term debt obligations to fund roads, land purchases or education facility construction without specific and accountable returns on investment for taxpayers. Where possible, the state budget will include the use of cash, rather than bonds to further protect the state from consequences associated with massive amounts of taxpayer-funded debt.

3. Cut Government Waste

Governor Scott will require all state agencies to eliminate government waste and propose a total of at least \$100 million in reductions for the FY 2014-2015 budget.

In business, Governor Scott knew that companies had to become more efficient and reduce costs for better services by two to three percent each year to remain competitive. Taxpayers deserve no different from the government that they fund. Accordingly, the Governor has recommended and the Legislature has agreed to reduce costs for government programs each year since he was elected.

In proposing his It's Your Money Tax Cut Agenda, the Governor will ensure that all state agencies continue to recommend reductions in spending each year to eliminate government waste, which will in turn, free up dollars to be returned to taxpayers, pay down debt and place funds in reserve for events such as hurricanes.

Governor Scott will hold state agencies accountable for continuously reviewing all state contracts in order to identify savings.

Since October 2012, 16 different state agencies and more than 45 private sector businesses have been recognized for identifying more than \$146.3 million in cost savings and \$34.2 million in services.

Savings achieved through these efforts include:

\$117.2 million in cost savings from renegotiated contracts
\$15.9 million in cost savings from newly negotiated contracts
\$13.1 million in cost savings from contract renewals; and
\$34.2 million in value added services from contract renegotiations.

24	2011-229	Corporate Income Tax	Increases Income Exemption for Business Taxes	HB 7185

Appendix B

Automobile License Tax Rollback

Summary:

The bill rolls back the fees associated with the annual registration of a motor vehicle registration to the level in effect prior to the increases passed in 2009. The reduction amounts to over \$25 for the registration of a typical automobile.

Effects of the Proposed Changes:

The Governor proposes to return Florida families all of the fees associated with the registration of a motor vehicle back to their pre-2009 level effective September 1, 2014, resulting in a decrease of over \$25 for the registration of a typical automobile as detailed in the table below:

Components of Initial or Renewal Fees for a Typical Automobile (3,586 lbs)

SAMPLE REGISTRATION TAX	Pre 2009 Fee	Current Fee	Proposed Fee	Taxpayer's Impact	% Change
STATE Registration base tax	\$32.50	\$44.00	\$32.50	(\$11.50)	-26.1%
Additional Statutory Fees					
STATE Retro Reflective Material fee	\$0.50	\$1.50	\$0.50	(\$1.00)	-66.7%
STATE Florida Real Time Vehicle Information System fee	\$0.50	\$1.25	\$0.50	(\$0.75)	-60.0%
STATE Air Pollution fee	\$1.00	\$1.00	\$1.00		
STATE Emergency Medical Services	\$0.10	\$0.10	\$0.10		
STATE Law Enforcement Radio Systems	\$1.00	\$1.00	\$1.00		
STATE General Revenue/DJJ Surcharge (previously Juvenile Justice)	\$1.00	\$5.50	\$1.00	(\$4.50)	-81.8%
STATE Transport Disadvantage	\$1.50	\$1.50	\$1.50		
STATE STTF Surcharge on all vehicles (previously Surcharge State Transport)	\$2.00	\$4.00	\$2.00	(\$2.00)	-50.0%
STATE Advanced Replacement fee	\$2.00	\$2.80	\$2.00	(\$0.80)	-28.6%
STATE Automated license plate validation sticker printer service fee	\$1.00	\$3.00	\$1.00	(\$2.00)	-66.7%
STATE registration service charge	\$0.00	\$2.50	\$0.00	(\$2.50)	-100.0%
Subtotal of Additional Statutory Fees	\$10.60	\$24.15	\$10.60	(\$13.55)	-56.1%
Tax Collector registration service charge	\$2.50	\$2.50	\$2.50		
Tax Collector branch fee	\$0.50	\$0.50	\$0.50		
Tax Collector mailing fee	\$0.70	\$0.70	\$0.70		
Subtotal retained by Tax Collector	\$3.70	\$3.70	\$3.70	\$0.00	0.0%
GRAND TOTAL	\$46.80	\$71.85	\$46.80	(\$25.05)	-34.9%

These reductions are estimated to reduce General Revenue collections by \$312m in FY 14/15 and \$401m on a recurring basis. Table is based on and expanded from: <http://www.flhsmv.gov/FeeSamples.htm>
