Together we can ensure that Florida's children are raised in healthy, safe, stable and nurturing family environments.

PART 1 - INTRODUCTION TO THE PLAN

I. <u>CIRCUIT TRANSMITTAL INFORMATION</u>

- A. Circuit number and listing of counties served in the circuit
- B. Local planning team convener (accountable circuit employee)
 - 1. Name: Liesta Sykes
 - 2. Title: Circuit 10 Community Relations Manager
 - 3. Address (street, city, zip): 1055 HWY 17, Bartow, FL 33830
 - 4. Telephone: (863) 534-7100, x.117
 - 5. Fax: (863)
 - 6. Email: Liesta_Sykes@dcf.state.fl.us
- C. Local planning team chairman (if different from the convener)
 - 1. Name: Kimberly Daugherty
 - 2. Title: Chief Community Relations Officer
 - 3. Address (street, city, zip): P.O. Box 1017, Bartow, FL 33830
 - 4. Telephone: (863) 519-8900, x.204
 - 5. Fax: (863) 519-8912
 - 6. Email:kdaugher@heartlandforchildren.org
- D. Circuit administrator
 - 1. Printed name: Ann Berner
 - 2. Signature: see cover page
 - 3. Date of signature: see cover page

II. PROCESS USED TO DEVELOP THE PLAN AND PLAN UPDATE

A. Who led the planning effort

The planning effort was jointly led by the Local Planning Team and designated staff members within Heartland for Children.

B. Narrative description of the circuit and the demographics of the counties in the circuit – using 2008 Census data.

Circuit 10 is comprised of three counties, Hardee, Highlands and Polk. The Circuit is located in central Florida and covers over 3,600 square miles. A large portion of the Circuit is rural with the major cities including Lakeland, Winter Haven and Sebring. Listed below is a demographic description of each county as listed by the U.S. Census Bureau.

Hardee County is 623.7 square miles with 1 square mile of water, and as of 2008 Hardee County had a population of 28,888 making it the 51st most populous county in Florida. The population demographics are 47% white, 42% other and 11% is reported as African American. Of the residents of Hardee County approximately 77% of the 8,585 households were made up of families, with 4,003 (46%) having one or more people under the age of 18 including 926 (10.8%) of the households with a single parent and 2,332 (27.2%) having one or more people over 65. 62% of the people 25 and over had at least graduate from High School while 38% were either not enrolled or graduated from high school. The total enrollment for schools is 5,900, with 570 in

kindergarten and nursery school, 4,800 in elementary to high school and 590 in college or graduate school.

The average household income was \$36,247, with 24% of the people living in poverty. Of the twenty four percent living in poverty, 32% were children 18 and under while 21% were 65 or older. 17% of all families and 27% of single mother households were living below the poverty level. In Hardee County there are 2 large employers; The Florida Institute for Neurological Rehabilitation and Wal-Mart. The unemployment rate was 6.5% with a total of 779 (37%) people being unemployed. The average commute to work was 23.4 minutes, of those that commute, 63% drove alone, 27% car pooled, 7% used other means, and 2% used public transportation.

Highlands County is 1,029 square miles with 78 square miles of water and as of 2008 had a population of 100,011 making it the 39th most populous county in Florida. The population demographics include 72.1% reported as white, 18.4% other and 9.5% African American. Of the residents of Highlands County approximately 65% of the 40,329 households were made up of families, with 9,787 (24.3%) having one or more people under 18 including 3,011 (7.5%) of the households with a single parent and 19,978 (49.5%) having one or more people over 65. There were 1,611 grandparents living with grandchildren, of those 773 (48%) were responsible for the grandchild. 24% of the 733 responsible for grandchildren 24% had been from 5 or more years. Of the population 25 years and older 76% had at least graduated from high school while 24% either were not enrolled in school or graduated from high school. The total enrollment for schools is 17,000 with 1,500 in nursery school and kindergarten, 13,000 children in elementary through high school and 2,900 in college or graduate school.

The average household income was \$34,018, with 16% of the population in poverty. Of the sixteen percent 23% of the were children under the age of 18 while only 9% were people 65 and over. 10% of all families and 36% of single mother households had income below the poverty levels. In Highlands County there are 5 larger employers; Florida Hospital, Wal-Mart, Highlands Regional Medical Center, Cross Country Automotive Sales and Medical Data Systems, Inc. The unemployment rate for Highlands County is 7% with a total of 2,919 being unemployed. The average commute to work is 22 minutes, with 76% driving alone, 15% carpooling, 5% using other means, and less than .5% using public transportation.

Polk County is larger that the state of Rhode Island and equal to the size of Delaware with 2,010 square miles making it the 4th largest county in Florida. Of the 2,010 square miles, approximately 135 (7%) are occupied by 554 natural freshwater lakes. The population in 2008 was 580,594 making Polk County the 9th most populous county in Florida with 3.1% if Florida's entire population. The population demographics include 67.1% reporting as white, 14.4% African American and 18.5% as other. Of the residents of Polk County approximately 71% of the 224,000 households were made up of families, with 74,964 (33.4%) of households having one or more people under 18 with 22,430 (10%) being in a single parent household while there were 69,371 (30.9%) of households with one or more people 65 and over. There were 13,670 grandparents living with grandchildren of those 6,380 (46.7%) were responsible for the grandchild. 2,330 (17%) had been responsible for 5 or more years. Of the population 25 and older 82% had at least graduated from high school while 18% were not enrolled or graduated from high school. The total enrollment for Polk County Schools was 127,000 with 16,000 in nursery school or kindergarten, 88,000 enrolled in elementary through high school and 23,000 in college or graduate school.

The average household income was \$44,633with 14% of the population living in poverty. Of the fourteen percent 21% of children under the age of 18 live in poverty verses 8% of people 65 and older. 11% of all families and 31% of single mother households in Polk County were living below poverty. There are several large employers in Polk County including Publix, Wal-Mart, Lakeland Regional Medical Center, MOSAIC, and Winter Haven Hospital. The

unemployment rate is 6.7% with 18,301 people unemployed. The average commute to work is 25.4 minutes with 81% driving alone, 12% carpooling, and 0.5% used public transportation and the remaining 4% that commuted used other means.

One of Circuit 10's strengths is the number of agencies and providers that are interested in improving the well-being and safety for children and families in our community. The Circuit has a Children's Cabinet that has brought together over 50 agencies interested in working collaboratively for children and families. This group works in conjunction with the Local Planning Team, to meet the strategic goals that have been set out.

The Department of Children and Families in Circuit 10 contracts with Heartland for Children, the Community Based Care Lead Agency, for services including Foster Care, Adoptions, Protective Services, Independent Living and Child Abuse Prevention. Heartland for Children, through its network of contracted provider agencies and partners, has strategically established a wide array of services available to support children and families in the Child Welfare System and the community at large.

This array of services includes:

- Child Abuse Prevention
- Foster Care and Adoption recruitment, training and retention
- Protective Services Case Management
- Independent Living Services for teens and young adults
- Diversion services in coordination with the Department of Children and Families Child Protective Investigators
- Behavior Analysis Services
- Training and Support

Child Welfare System of Care Accomplishments for 2008-2009 FY

Provided 1236 children in home service support through family intervention teams to keep children safe allowing us to save \$3.34 for every dollar spent

Provided prevention services to 134 children to prevent these children from being removed from their home

4824 children were provided direct case management and prevention services

1695 adoptive families are receiving adoption subsides to support adoptive children

57% of case manager have a case load of 15 or less children

53% reduction in our out of home care population

We have successfully diverted 53% of youth and their families by Child Protection Investigations to community services which keeps these cases from entering the child welfare system.

We continue to meet our adoption goal each year and we have significantly decreased the adoption pool of children available for adoption.

C. Brief narrative description of the membership of the planning team(s).

The Local Planning Team consisted of leadership from a variety of local programs focused on children's issues along with the Child Abuse Prevention and Adoptions staff members within Heartland for Children. Assistance from other local partners was sought as needed. Attachment 1 includes the roster of participants.

D. Overview of the meetings held

Attachment 2 identifies a schedule of all 2009-2010 Local Planning Team Meetings.

E. Overview of the plan development process

The Local Planning Team participated in discussions over the course of many meetings regarding issues facing our local circuit in regards to better supporting families in need within our service area. When data was provided from the state level, this data was incorporated into the planning process to help guide discussions. The Local Planning Team made decisions as to what the focus of the 5-year plan should be and the actual plan was put together by the Heartland for Children Prevention and Adoption staff members involved in the process. Draft plans were shared with the Local Planning Team and the local Children's Cabinet for input and review before the final plan was submitted.

$\underline{PART\ 2}$ – PLAN FOR THE PREVENTION OF ABUSE, ABANDONMENT, AND NEGLECT OF CHILDREN

I. STATUS OF CHILD MALTREATMENT

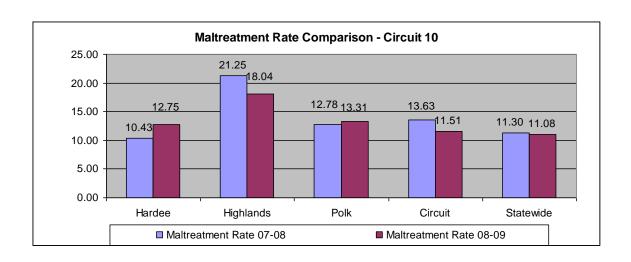

Status of child maltreatment (including the documentation of the magnitude of the problems of child abuse, including sexual abuse, physical abuse, and emotional abuse, as well as child abuse, abandonment, and neglect in the geographical area) §39.001(8)(b)6.a

Data to be provided by the Department of Children and Families and reported by the circuits include:

- 1. Child maltreatment counts for State Fiscal Year (SFY) 2007-2008 and
- 2. Child population counts for SFY 2007-2008
- 3. Child maltreatment counts for SFY 2008-2009 [***State Plan Goal***]
- 4. Child population counts for SFY 2008-2009
- 5. Unduplicated counts of victims by no indication, by some indication and by verified abuse (most serious finding on any report for the child)

When looking at Circuit 10 Maltreatment rate data per 1000 children in the population, it is apparent that while Highlands County is still well above the statewide average, they have made significant improvement. Hardee and Polk Counties both saw increases in their maltreatment rates over the two year span, but the Circuit as a whole saw an overall decrease of 2.12. The overall Circuit remained slightly higher than the statewide average maltreatment rate.

After further analysis of the data, it was apparent, that even though the maltreatment rates did not reflect improvements in two of the counties in Circuit 10, there were significant improvements as listed in the chart below. While Hardee County saw a slight decrease in their child population, both Highlands and Polk Counties saw a slight increase in their child populations. Other than one additional verified finding in Hardee over the two year span, the Circuit saw large percentage decreases in the number of maltreatments, despite the smaller percentage increases in child population numbers.

Maltreatment Measure	FY 2007-2008	FY 2008-2009	Increase or Decrease
Hardee			
Child Population	7287	7246	56%
Verified Findings	76	77	1.3%
Some Indication	135	97	-28.1%
No Indication	248	169	-31.9%
Total Maltreatment	459	343	-25.3%
Highlands			
Child Population	18678	18757	.42%
Verified Findings	397	282	-29%
Some Indication	487	341	-30%
No Indication	772	635	-17.7%
Total Maltreatment	1656	1258	-24%
Polk			
Child Population	141226	141837	.43%
Verified Findings	1805	1573	-12.9%
Some Indication	3168	2375	-25%
No Indication	5322	4347	-18.3%
Total Maltreatment	10295	8295	-19.4%
Circuit 10			
Child Population	167191	167840	.39%
Verified Findings	2278	1932	-15.2%
Some Indication	3970	2813	-29.1%
No Indication	6342	5151	-18.8%
Total Maltreatment	12410	9896	-20.3%

6. Counts of children with most serious finding of verified abuse by age

Infants under the age of 1 year had the highest percentage of verified abuse as compared to other age groups at 13.8% for the Circuit. As the age of the child increases, the percentage of verified abuse decreases pretty steadily through the teenage years. When grouping ages of children for planning service delivery it is helpful to use the following breakdown:

Infants through the age of 1 = 535 verified victims (23.6%) 2 - 4 year olds = 527 verified victims (23.2%) 5-8 year olds = 445 verified victims (19.6%)

9-13 year olds = 444 verified victims (19.6%)

14-18 year olds = 316 verified victims (13.9%)

7. Counts by the array of allegations of abuse

And

8. Counts by the array of allegations of abuse that were verified

The highest verified maltreatments for all three counties were Environmental Hazards, Family Violence Threatens Child, Inadequate Supervision, Substance Misuse and Threatened Harm. This appears to be consistent with levels across the state. It is noted that Hardee County verifies a higher percentage of Environmental Hazard cases and Threatened Harm cases, but verifies a lower percentage of Family Violence Threatens Child cases and Medical Neglect cases. It is hard to determine whether these differences are related to different training or processes at the investigative level between counties or possibly differences in how the courts handle these cases. Based on the incidences of these maltreatments, they are occurring at the same levels, but they are being verified at different rates. Highlands County also verifies a significantly higher number of Threatened Harm cases than the state average and that of Polk County. One other noteworthy item is that Hardee County verified a significantly lower amount of Medical Neglect cases than the other counties in the circuit and the state average. It is hard to know if there is any trend relating to this data until there is comparable data over time.

County is base												

County is based on the county of intake at the time the call is accepted at investigation. This is the county which the child(ren) are located at the time of the call.

The Maltreatment Counts are for the 12 month period June '08 through May '09. This allows 60 days for all investigations received during this period to be completed and closed and 10 days for all data entry to be finalized.

9. Demographics (i.e., age, race, and gender) of children who were subjects of investigations (unduplicated counts)

Information on the ages of alleged victims is in direct correlation to that of the age of verified victims. The highest number of alleged victims occurs between the ages of 0-4 years of age. In relation to the gender of the alleged victims, there are slightly more male victims in Hardee and Highlands Counties as compared to Polk County, where there are slightly more female victims than male victims. In regard to race, it is important to note that the Hispanic population in Circuit 10 is not accounted for accurately with the data provided.

Demographic Detail of Alleged Victims for Reports Received During Fiscal Year 2008-2009

			RACE			GENDER				AGE			
Circuit	County	White	Black	Other	Male	Female	Unknown	0- 4 yrs.	5 - 8 yrs.	9 - 17 yrs.	18+ yrs.	Unknown	Totals
10	Hardee	347	36	14	207	189	1	129	105	163	0	0	397
10	Highlands	1,064	304	101	742	724	3	578	303	587	1	0	1,469
10	Polk	6,685	2,466	457	4,668	4,910	30	3,538	2,220	3,832	1	17	9,608
	Totals	8,096	2,806	572	5,617	5,823	34	4,245	2,628	4,582	2	17	11,474

County is based on the county of intake at the time the call is accepted at investigation. This is the county which the child(ren) are located at the time of the call. Count is based on children who are alleged victims of abuse for reports accepted at Intake. Does not exclude alleged victims in reports that are eventually closed as No Jurisdiction or Duplicates.

10. Demographics and other characteristics that may be available for perpetrators (i.e., age, race, and gender)

In contrast with the gender of the alleged victims, the gender of the alleged perpetrators is slightly higher for females than males in all three counties. The significant Hispanic population in Circuit 10 is not accounted for due to the manner in which the data is tracked.

Total Number of Alleged Perpetrators Received by Intake County During Fiscal Year 2008-2009

		RACE			GENDER		AGE				
County	White	Black	Other	Male	Female	Unknown	< 18 yrs.	18 - 25yrs.	26+ yrs.	Unknown	Totals
Hardee	273	52	23	161	182	5	7	97	243	1	348
Highlands	800	204	90	510	546	38	15	241	828	10	1,094
Polk	5,495	1,666	494	3,452	4,014	189	58	1,634	5,893	70	7,655
Totals	6,568	1,922	607	4,123	4,742	232	80	1,972	6,964	81	9,097

County is based on the county of intake at the time the call is accepted at investigation. This is the county which the child(ren) are located at the time of the call.

Count is based on children who are alleged perpetrators of abuse for reports accepted at Intake. Does not exclude alleged perpetrators in reports that are eventually closed as No Jurisdiction or Duplicates.

11. Counts by recommendations for services (unduplicated by child and investigation).

The highest number of referrals for services recommended fell into five categories, including Case Management Services, Child Counseling Services, Day Care Services, Information and Referral and Substance Abuse Services. When comparing the services recommended to the highest occurring maltreatments, these services fall in line with those nicely, such as Day Care Services for Inadequate Supervision, Substance Abuse Services for Substance Misuse, etc. There is a significant number of services identified as "other", however, and this makes it difficult to be able to ascertain which services are being utilized or are needed.

Count of Services Recommended at Disposition for Alleged Victims in Reports Received July 1, 2008 June 30, 2009

	County

II. CONTINUA OF PRIMARY AND SECONDARY PREVENTION PROGRAMS

A continuum of programs necessary for a comprehensive approach to prevention of all types of child abuse, abandonment, and neglect (including brief descriptions of such programs and services) §39.001(8)(b)6.f

It is the intent of this planning effort to prevent child abuse, abandonment, and neglect before it ever occurs. Thus, for the purpose of this prevention plan, the continuum of programs (necessary for a comprehensive approach to prevention of all types of child abuse, abandonment, and neglect) focuses on the first two of the three levels of prevention and prevention-focused strategies:

Primary using Universal	Secondary using Selected	Tertiary using Indicated
Strategies	Strategies	Strategies
Primary prevention is geared to the general public to prevent child maltreatment from ever occurring. Universal strategies are accessible to anyone with the goal of preventing child maltreatment from ever occurring in the first place.	Secondary prevention is geared to communities and families who are vulnerable and at risk of child maltreatment (e.g., have multiple risk factors – parent age, poverty, substance abuse, domestic violence, maternal depression). Targeted strategies assist these vulnerable groups with the goal of preventing child maltreatment from ever occurring in the first place.	Tertiary prevention consists of activities targeted to families that have confirmed or unconfirmed child abuse and neglect reports. These families have already demonstrated the need for intervention, either with or without court supervision. These are families that qualify for services under child welfare programs. These are families where there is an open case.

II.A. CONTINUUM OF <u>PRIMARY/UNIVERSAL</u> PREVENTION PROGRAMS AND SERVICES Accessible by the general public prior to the occurrence of child abuse and neglect

Community Development – Community capacity building, community partnerships, etc.

Community Support for Families – Family resource centers, community events and fairs, etc.

Family Supportive Programs/Services – Voluntary home visiting; developmental screening; affordable, accessible quality childcare; before and after school programs; recreational activities; parent support groups; parent education classes; marriage and relationship counseling and support services; etc.

Information and Referral and Helplines – Access to information about community and social services available for families including early health and development services, etc.

Public Awareness and Education Campaigns – Highlighting risk/protective factors, child development, positive parenting, child safety, domestic violence and substance abuse prevention, bullying prevention, etc.

Workforce – Family-friendly workplace policies, livable wage policies, etc.

II.B. CONTINUUM OF <u>SECONDARY/SELECTED</u> PREVENTION PROGRAMS AND SERVICES Targeted to families with multiple risk factors prior to the occurrence of child Abuse and Neglect

Adult Education – High School Diploma, GED, job training, ESL classes, mentoring for high risk youth, etc.

Community Development – Community building, community partnerships, etc.

Community Support for Families – Food banks, clothing banks, housing assistance, transportation, emergency assistance, food stamps, quality childcare, etc.

Concrete Services – Referrals for (or provision of) clothing, food, utility payments, housing assistance, transportation, emergency assistance, respite care, etc.

Family Supportive Programs/Services – Voluntary home visiting (e.g., for families that meet Healthy Families Florida and Healthy Start criteria), parent education classes, teen parenting services, parent self-help support groups, domestic violence supports, substance abuse and mental health services, respite care (including families with disabilities), counseling for adults and children, developmental assessments, etc.

Workforce – Family-friendly workplace policies and livable wage policies, etc.

II.C. FLORIDA'S ECOLOGICAL FRAMEWORK

Florida's ecological framework serves to organize the potential influence and impact of prevention strategies and is based on the following assumptions:

- Children and families exist as part of an ecological system. This means that prevention strategies must target interventions at multiple levels: the individual, the relationship, the community, and society.
- Primary responsibility for the development and well-being of children lies within the family, and all segments of society must support families as they raise their children.
- Assuring the well-being of all families is the cornerstone of a healthy society and requires universal access to support programs and services.

It comprises four levels of influence:

- 1. *Individual level*: At this level are **parent and child characteristics** emotional and psychological characteristics, temperament, behavior, problem-solving skills, health conditions, and beliefs that can affect the rearing of children. Interventions at this level are often designed to affect an individual's social skills, cognitive skills, behavior and immediate circumstances.
- 2. **Relationship level:** Interpersonal relationships with peers, intimate partners, and family members shape an individual's behavior and range of experiences. This level contains factors such as family size, cohesion, communication, support, conflict, and stability that directly affect the child and influence the way in which adults care for children and each other. Interventions at this level are often designed to improve a person's ability to engage in positive and constructive relationships, especially within the immediate family.

- 3. *Community level*: Families operate within **neighborhoods and communities**. Factors that characterize this level include availability of supports (governmental and community), stability, violence, poverty, disorganization, and isolation; all affect the ability of families and communities to nurture their children. Interventions at the community level are typically designed to impact the climate, systems and policies in a given (usually geographic) setting.
- 4. Societal level: The larger culture in which families operate and children are raised plays a significant role in how families care for their young. Religious or cultural belief systems, values such as self-reliance and family privacy, and the cultural acceptance of media violence and corporal punishment of children affect the way in which parents raise their children and the ways in which communities support families. Interventions at the societal level typically involve collaborations of multiple partners to change laws and policies as well as to determine and influence societal norms and harmful cultural belief systems.

Florida's Socio-Ecological Continuum of Primary/Universal Prevention Strategies

Accessible by the General Public Prior to the Occurrence of Child Abuse and Neglect

SOCIETAL LEVEL

Florida's Child Abuse Prevention and Permanency Strategic Plan

Community Development – Community capacity building, community partnerships, etc.

Public Awareness and Education Campaigns

Workforce - Family-friendly workplace policies, livable wage policies, etc.

COMMUNITY LEVEL

Community Support for Families – Family resource centers, community events and fairs, etc.

Public Awareness and Education Campaigns – Highlighting risk/protective factors, child development, positive parenting, child safety, domestic violence and substance abuse prevention, bullying prevention, etc.

RELATIONSHIP LEVEL

Information and Referral and Helplines – Access to information about community and social services available for families including early health and development services, etc.

Family Supportive Programs/Services – Voluntary home visiting; developmental

Family Supportive Programs/Services – Voluntary home visiting; developmental screening; affordable, accessible quality childcare; before and after school programs; recreational activities; parent support groups; parent education classes; marriage and relationship counseling and support services; etc.

INDIVIDUAL LEVEL

Family Supportive Programs/Services – Voluntary home visiting; developmental screening; affordable, accessible quality childcare; before and after school programs; recreational activities; parent support groups; parent education classes; marriage and relationship counseling and support services; etc.

Socio-Ecological Continuum of Secondary/Selected Prevention Strategies Targeted to Families with Multiple Risk Factors Prior to the Occurrence of Child Abuse and Neglect

Example provided for illustrative purposes only for the CAPP Council from the Ounce of Prevention Fund of Florida

III. PROGRAMS CURRENTLY SERVING CHILDREN WHO HAVE BEEN MALTREATED

Description of programs currently serving abused, abandoned, and neglected children and their families (including information on the impact, cost-effectiveness, and sources of funding) §39.001(8)(b)6.b

These data have been collected and reported as a part of the Florida Child Abuse Prevention and Permanency Plan: January 2009 – June 2010 and have been updated within Florida's Child and Family Services Plan as submitted in June 2009.

IV. CHILD MALTREATMENT PREVENTION PROGRAMS

Description of programs for the prevention of child abuse, abandonment, and neglect (including information on the impact, cost-effectiveness, and sources of funding) §39.001(8)(b)6.b

IV.A. <u>PRIMARY/UNIVERSAL PREVENTION STRATEGIES</u> – PROGRAMS ACCESSIBLE BY THE GENERAL PUBLIC PRIOR TO THE OCCURRENCE OF CHILD ABUSE AND NEGLECT

Note: Primary prevention is geared to the general public to prevent child maltreatment from ever occurring. Universal strategies are accessible to anyone with the goal of preventing child maltreatment from ever occurring in the first place.

Attachment 3 includes data that was submitted electronically by providers into a statewide database and has been made accessible to Circuit 10. Although this data is a solid foundation on which we will grow our local efforts to catalogue all primary prevention efforts, we wanted to highlight some prevention programs that are currently in place.

Listed below is a brief synopsis of some local child abuse prevention initiatives that focus on primary prevention.

Mini-Grants Tied to Protective Factors

Twice a year, Heartland for Children offers the opportunity for local individuals, businesses and non-profit agencies to apply for a small amount of time-limited funding to help support activities and programs that implement one or more protective factors that have been found to reduce the incidence of child abuse and neglect. A mini-grant award can range anywhere from \$500.00 to \$2500.00 and are meant to support new and innovative projects and ideas that will enrich and add additional resources to support the outstanding work that is happening in our local communities. They can also help supplement existing projects that may have experienced cuts in funding.

Heartland for Children currently tracks the number of grants awarded for each grant cycle along with other data regarding each grant, such as how much money each program/project is granted and which protective factors are being addressed. Each grant recipient is expected to track specific outcomes related to their program/project. These outcomes vary according to the program/project and are included in the grant final report submitted by each agency/group.

Infant Massage

Infant Massage has been found to benefit both parent and child by increasing parent/child bonding and reducing stress responses in infants and parents as well as decreasing post partum depression. Heartland for Children is focused on building capacity within the communities we serve in regards to infant massage so that it is a service that is accessible to all families. Heartland for Children offers periodic infant massage educator courses to individuals in the community who are willing to commit to offering the service within the community for a minimum of two years. These educators offer the courses at a low cost for families and have a minimum of two scholarship opportunities per class they offer for at-risk families referred by Heartland for Children. Through infant massage parents/caregivers learn how their infants communicate, creating a better bonding or closeness to the infant. Parents/caregivers can gain confidence in parenting skills through this bonding. Infant massage also helps parents/caregivers to relax and spend quality time with the infants and facilitates a time for fathers to interact with the infant. The parents/caregivers also have an opportunity to create a social network with other parents, thus alleviating the feeling of

isolation reducing a risk for child abuse. The infant benefits from massage by relieving discomfort from gas, colic and constipation. Massage also helps reduce stress in infants as well as aides with better sleeping.

Heartland for Children tracks data on each infant massage educator that is trained and requires each educator to keep track of how many families are served in each class.

Parents Under Construction

Parents Under Construction is a research based parenting curriculum designed to be taught to children. It is a program offered through ChildBuilders via four different curricula: Pre-K, K-3rd grade, 4-6th grade and 7-12th grade. Without education in parenting, people will parent how they were parented and a lack of information about child development and positive discipline techniques has a direct correlation with child abuse. The Parents Under Construction curriculum includes lessons pertaining to parenting styles, realities of raising children, communication skills, parenting myths, positive discipline techniques and nonviolent conflict resolution. Each program includes parent involvement activities in every lesson and evaluation results show that parents overwhelmingly approve of the program. Heartland for Children has set up a system by which individuals in the community are trained to become Parents Under Construction educators and then they are asked to make a minimum two-year commitment to implementing the program for children they work with. Formal research evaluations have revealed that children learn and remember information presented in the curriculum, that children's attitudes towards positive parenting practices significantly improve and that teachers using the curriculum indicate their students' prosocial behavior skills improve after classroom implementation. At this current time, Heartland for Children is tracking the number of educators and the number of child participants in this curriculum with the hopes or identifying a survey instrument to capture additional outcome data.

Yellow Dress - Teen Dating Violence Prevention

The Yellow Dress is a one-woman play that is focused on teen dating violence prevention. It is a program from Deana's Educational Theater group and Heartland for Children has purchased limited production rights to implement the program locally. The Yellow Dress was developed as an educational tool to illustrate the seriousness of violence in dating relationships, and offers a platform from which discussion can begin around healthy dating relationships. During the performance, the actress tells the story of how a relationship that started as friendship blossomed into love and then became violent. The audience participates in a discussion after the performance to reinforce knowledge of four primary lessons relating to domestic violence:

- 1. Early warning signs of an abusive relationship
- 2. Why victims stay in abusive relationships; why it is hard to break up
- 3. How to help a friend who is a victim of abuse or a perpetrator (abuser)
- 4. How to access local resources for help

Heartland for Children is currently implementing the Yellow Dress program in local high schools and other community groups that work with local teens. A survey instrument is being utilized to track the number of participants and their learning gains on the four primary lessons covered during the program.

Prevention Cases -Self referral and agency referral

The Heartland for Children prevention team works with families in need of assistance in hopes of connecting them to resources and supports and thus reducing the likelihood that the family will become involved with the formal child welfare system. The referral sources for

this service consist of community agencies, the school system and self-referrals. The Prevention Resource Specialist works with the family to identify needs and make appropriate referrals to local community resources. The family team conference model is utilized in some cases as needed to encourage self-sufficiency and self-help behaviors.

The data elements tracked for this service mirror that of the requirements for data elements in the diversion program as close as possible. This information minimally includes the family name and contact information, the referral source, how many children are in the home, what services the family is referred to and the duration of the case.

Child Abuse Prevention Month Awareness and Education - Pinwheels for Prevention

Each April, Heartland for Children leads efforts to coordinate a community wide effort to implement the Pinwheels for Prevention campaign for Child Abuse Prevention Month. These primary prevention initiatives focus on holding family friendly events throughout the month, educating the public about how they can help to prevent child abuse and providing resources to advocates and families to help strengthen their family unit. April was utilized as a platform to engage local community leaders and reach out to legislators.

The data elements that are tracked for this effort include the number of times the local media covers the issue, the number of agencies that participate, the number of events, how many materials are distributed to families and advocates, the number of pinwheel gardens planted and the number of posters and banners displayed in our community.

Speaker Series

Heartland for Children is currently sponsoring the 2009/2010 STRENGTHENING & SUPPORTING FAMILIES COMMUNITY SPEAKER SERIES. This speaker series includes events that are free and open to the public. Heartland for Children is sponsoring these events as we encourage communities to provide safe, nurturing experiences that promote healthy child development, positive parent-child interaction and individual action to make children in our community a priority. The topics for each session focus on providing families with new information on issues that are current and relevant to families.

At each speaking event, participation is tracked. Parent surveys are provided to ascertain the value of each speaking event as well as to track parenting norms and beliefs within our community. Heartland for Children believes that providing this opportunity in the community, we will reach parents from various backgrounds and belief systems and will strengthen their parenting skills and provide parenting support.

In addition to the above mentioned programs, Circuit 10 has a Child Passenger Safety initiative coordinated by the Safe Kids Coalition that also focuses on other child safety awareness and education initiatives including water safety, bike and pedestrian safety. The goal is to have well informed caregivers relating to child safety issues.

The United Way of Central Florida operates the local 211 initiative offering information and referral to local individuals in need. In partnership with the Department of Children and Families and Heartland for Children, the United Way is also helping to get the Whole Child Initiative up and running in our local Circuit. This initiative is done as part of the Lawton Chiles Foundation efforts to make Whole Child Communities available statewide. Once this project is up and running, parents will be able to identify their family needs and get matched with local resources and service providers. The United Way also heads up the Success by 6 program which is a community-wide children's initiative, founded in 1995 by Carol Jenkins Barnett of Publix Super Market Charities and spearheaded by United Way of Central Florida, that brings together resources from a partnership of private businesses, government, religious groups, educators, and health and human service organizations. Volunteers serve on four

active committees, representing over 85 organizations. Success By 6 is an initiative to make early childhood development a top priority in Polk, Hardee and Highlands counties. Family Fundamentals is a Success by 6 program which is a 10,000 square foot facility with a library, computer lab, family learning kitchen, model pre-school classroom, dramatic play room and conference room.

More than 50 partner agencies offer services onsite to provide a one-stop opportunity for parents. Parents and other caregivers come to access information, support services, activities, and other tools to be the best parents they can be. Recurring activities include early literacy, infant stimulation, support groups, and a variety of special events that promote school readiness with fund activities and special guests. Many classes are offered from parent education to stress reduction.

The Healthy Start Coalition operates the Teen Pregnancy Prevention Alliance (TPPA), which has assisted in reducing teen pregnancy rates in our Circuit by 40% through a teen leadership group, public awareness campaigns and teen summits to provide local teens with the information and education needed on this topic.

Many local schools in Circuit 10 participate in the All Pro Dad program through Family First, whose mission is to strengthen the family by establishing family as a top priority in people's lives and by promoting principles for building marriages and raising children. All Pro Dad.is a simple idea with a profound impact. It's a one-hour monthly breakfast held before school where fathers and their children meet with other dads and kids in the school cafeteria or a local restaurant. During this time, they discuss a wide range of family topics, spend time together, create fun memories, and are equipped with resources to strengthen their relationship.

IV.B. <u>SECONDARY/SELECTED PREVENTION STRATEGIES</u> – PROGRAMS TARGETED TO FAMILIES WITH <u>MULTIPLE RISK FACTORS FOR CHILD ABUSE</u> PRIOR TO THE OCCURRENCE OF CHILD ABUSE AND NEGLECT

Note: Secondary prevention is geared to communities and families who are vulnerable and at risk of child maltreatment (e.g., have multiple risk factors – parent age, poverty, substance abuse, domestic violence, maternal depression). Targeted strategies assist these vulnerable groups with the goal of preventing child maltreatment from ever occurring in the first place.

Please see Attachment 3 for a detailed catalogue of services provided in Circuit 10.

Prevention Cases -Self referral and agency referral

The Heartland for Children prevention team works with families in need of assistance in hopes of connecting them to resources and supports and thus reducing the likelihood that the family will become involved with the formal child welfare system. The referral sources for this service consist of community agencies, the school system and self-referrals. The Prevention Resource Specialist works with the family to identify needs and make appropriate referrals to local community resources. The family team conference model is utilized in some cases as needed to encourage self-sufficiency and self-help behaviors.

The data elements tracked for this service mirror that of the requirements for data elements in the diversion program as close as possible. This information minimally includes the family name and contact information, the referral source, how many children are in the home, what services the family is referred to and the duration of the case.

Healthy Start Coalition of Hardee, Highlands and Polk Counties

The Healthy Start program, a state wide initiative, is housed at the local County Health Departments. The Coalition works in conjunction with multiple agencies that promote healthy pregnancies, babies and young children up to age 3. The program is voluntary and based on need not income or insurance. The Healthy Start program utilizes numerous programs to address risky behaviors such as Beds 4 babies, identifying the need for a safe place for the infant or toddler to sleep. Childbirth Education, breastfeeding support, and nutrition education are also offered to all pregnant women and parents of children under the age of 3. The Healthy Start Coalition is an integral part of secondary prevention in Circuit 10.

Healthy Families

The Healthy Families program provides a statewide system of voluntary, community-based home visitation services that strengthen families, promote positive parent-child relationships and optimize the health and development of children. Healthy Families Florida provides free home visiting services to parents expecting a baby and parents of newborns.

Diversion Cases / Family Intervention Teams

The Family Intervention Teams are an in home family preservation service to ensure the safety of children and to help stabilize the family. The goal is to maintain the child in the home with their family while ensuring immediate and long term protection of the child's permanency, safety and well being. The Family Intervention Team provides services which encourage and support the prevention of abuse, neglect or abandonment and support reunification and permanency of the child's home. The services are either voluntary or court ordered and can be accessed by Child Protection Investigators, Case Management Organizations and Heartland for Children.

As Circuit 10 moves forward with both primary and secondary prevention efforts, it is important to get a baseline picture of what services were inventoried through the statewide effort. Listed below are some summary findings based on the data provided in Attachment 3.

Initial Service Inventory as of May 2010 for Circuit 10

Service Category		Hardee	Highlands	Polk	Grand Total
Adoption Promotion and Awareness		1	1	3	5
Adoption Support Groups				1	1
Adult Education		8	10	13	31
Assistance navigating the system				5	5
Case Management Services				1	1
Child specific Recruitment Efforts		1	1	5	7
Community Development		14	16	23	53
Community Support		10	10	16	36
Concrete Services		24	24	23	71
Education and Training		4	6	9	19
Family Support Programs		20	25	41	86
Information and Referral Helplines		10	10	11	31
Orientation for Prospective Adoptive Parents				4	4
Placement Case Management				6	6
Pre-adoption Information				3	3
Pre-adoption Training for Prospective Adopti	ve Parents			6	6
Public Awareness and Education Campaigns	3	17	19	17	53
Targeted Recruitment Efforts		2	2	9	13
Workforce		4	7	6	17
Grand Total		115	131	202	448

Hardee and Highlands Counties have experienced some challenges to having the same access to services as that of Polk County due to their size and the rural nature of their communities. The services that were inventoried do not show a presence in Hardee or Highlands Counties for many services related to adoption and case management. In sections 3 and 4 of this plan, a detailed account of adoption services serving the Circuit is provided that validates these services are in fact available in these counties.

	Protective Factors Addressed				
	by Services	Hardee	Highlands	Polk	Grand Total
Adoption Promotion	Parental Emotional Resilience	2	2	35	39
	Nurturing and Attachment	2	2	35	39
	Knowledge of Parenting and Child				
	Development	2	2	35	39
	Social Connections	3	3	33	39
	Concrete Support in Times of Need	2	2	23	27
	Unsure	1	1	5	7
Adoption Support	Parental Emotional Resilience	3	5	10	18
	Nurturing and Attachment		2	7	9
	Knowledge of Parenting and Child				
	Development	4	6	11	21
	Social Connections	3	3	8	14
	Concrete Support in Times of Need	3	3	8	14
	Unsure				
Primary Prevention	Parental Emotional Resilience	26	29	33	88
	Nurturing and Attachment	12	12	20	44
	Knowledge of Parenting and Child				
	Development	28	28	32	88
	Social Connections	29	33	39	101
	Concrete Support in Times of Need	31	37	47	115
	Unsure	29	30	14	73
Secondary Prevention	Parental Emotional Resilience	16	20	42	78
,	Nurturing and Attachment	20	24	51	95
	Knowledge of Parenting and Child				
	Development	21	24	46	91
	Social Connections	13	13	35	61
	Concrete Support in Times of Need	25	29	49	103
	Unsure	5	7	4	16
Parental Emotional Resilience					
Total		47	56	120	223
Nurturing and Attachment Total		34	40	113	187
Knowledge of Parenting and					
Child Development Total		55	60	124	239
Social Connections Total		48	52	115	215
Concrete Support in Times of					
Need Total		61	71	127	259
Unsure Total		35	38	23	96

Of the 5 Protective Factors inventoried, the factor with the lowest number of services identified was nurturing and attachment. All other protective factors appear to be roughly in the same proportion across the counties and the totals are all similar for the Circuit.

Languages Provided	Hardee	Highlands	Polk
English	113	129	198
Spanish	81	86	149
French	13	13	13
Creole	43	41	58
German	13	13	13
American Sign Language	17	14	27
Not Identified	2	2	3

The Language breakdown gives us an idea of how prominent Spanish speakers are within the Circuit and that providers appear to be well equipped to handle their language needs. Circuit 10 has a multitude of providers offering services to individuals speaking at least 6 languages. When looking at the raw data one program/agency might offer several services, all of which are available in a specific language. Taking this into account, it is important to remember that the chart above lists the number of services available in that language and not the number of agencies or providers that offer services.

Final Analysis

After analyzing primary and secondary prevention efforts in Circuit 10 and comparing these efforts to the maltreatment data, the following conclusions were made:

- Circuit 10 has a strong infrastructure of both primary and secondary prevention programs.
- The most frequently occurring maltreatments for children are:
 - o Environmental Hazards
 - o Family Violence Threatens Child
 - o Inadequate Supervision
 - o Threatened Harm
 - Substance Misuse
- The highest maltreatment rates are occurring for children under 5 years of age.
- All counties within the circuit experienced percentage decreases in maltreatments despite the maltreatment rate increases for Hardee and Polk.
- The current services being recommended for families within the child welfare system are well matched to the highest occurring maltreatment types.
- There is a significant Hispanic population in our Circuit that is not adequately accounted for within the Florida Safe Families Network.

Next Steps

Circuit 10 plans to continue to strengthen the current structure of prevention services in our community and report on accomplishments, barriers and future plans each fiscal year.

Through establishing two new initiatives, the Whole Child Initiative and a Faith Based Initiative, the circuit will strengthen overall services available to families in our community. It is believed that these efforts will enhance the current structure by focusing on accessible services within each community.

V. PLAN PRIORITIES

A description, documentation, and priority ranking of local needs related to the prevention of child abuse, abandonment, and neglect based upon the continuum of programs and services. $\S 39.001(8)(b)6.g$

Priority Ranking of County-Level Needs Related to the Primary and Secondary Prevention of Child Abuse, abandonment, and neglect

County: Hardee

Priority	County-Level Need with Description	Level of Prevention Intervention Necessary to Address the Need O Primary (Universal Strategies) O Secondary (Selected Strategies)	Protective Factors that Should be Built/Supported when Meeting this Need Parental Emotional Resilience Social Connections Knowledge of Parenting and Child Development Concrete Support in Times of Need Nurturing and Attachment	
1	Reduce the number of verified findings of abuse for maltreatments including environmental hazards, family violence threatens child, inadequate supervision, substance misuse and threatened harm.	Primary (Universal Strategies) Secondary (Selected Strategies)	Parental Emotional Resilience Social Connections Knowledge of Parenting and Child Development Concrete Support in Times of Need Nurturing and Attachment	

County: Highlands

Priority	County-Level Need with Description	Level of Prevention Intervention Necessary to Address the Need O Primary (Universal Strategies) O Secondary (Selected Strategies)	Protective Factors that Should be Built/Supported when Meeting this Need Parental Emotional Resilience Social Connections Knowledge of Parenting and Child Development Concrete Support in Times of Need Nurturing and Attachment	
1.	Reduce the number of verified findings of abuse for maltreatments including environmental hazards, family violence threatens child, inadequate supervision, substance misuse and threatened harm. VI. PLAN OF ACTION FOR THE PREVENTION OF CHILD ABUSE, ABANDONMENT, AND NEGLECT

A plan for steps to be taken in meeting identified needs, including the coordination and integration of services to avoid unnecessary duplication and cost, and for alternative funding strategies for meeting needs through the reallocation of existing resources, utilization of volunteers, contracting with local universities for services, and local government or private agency funding §39.001(8)(b)6.h

Vision

Florida's highest priority is that children are raised in healthy, safe, stable, and nurturing families.

Mission

To serve as a blueprint that will be implemented to provide for the care, safety, and protection of all of Florida's children in an environment that fosters healthy social, emotional, intellectual, and physical development.

Outcome

All families and communities ensure that children are safe and nurtured and live in stable environments that promote well-being.

Circuit Goal 1

Children and teenagers are free from abuse, abandonment, and neglect and have safe, loving and permanent homes as measured by a reduction in the circuit-level child abuse rate from the fiscal year 2008-09 of 11.51 to a rate of 11.00 per 1,000 children by 30 June 2015.

County Hardee Goal 1.1

Children and teenagers are free from abuse, abandonment, and neglect and have safe, loving and permanent homes as measured by a reduction in the county-level child abuse rate from the fiscal year 2008-09 of $\underline{12.75}$ to a rate of $\underline{11.00}$ per 1,000 children by 30 June 2015.

County Highlands Goal 1.2

Children and teenagers are free from abuse, abandonment, and neglect and have safe, loving and permanent homes as measured by a reduction in the county-level child abuse rate from the fiscal year 2008-09 of <u>18.04</u> to a rate of <u>15.00</u> per 1,000 children by 30 June 2015.

County Polk Goal 1.3

Children and teenagers are free from abuse, abandonment, and neglect and have safe, loving and permanent homes as measured by a reduction in the county-level child abuse rate from the fiscal year 2008-09 of <u>13.31</u> to a rate of <u>11.00</u> per 1,000 children by 30 June 2015.

Strategy 1

By 30 June 2015, Circuit <u>10</u> will have implemented a faith-based prevention initiative that would provide for both universal and targeted efforts in which the faith community is engaged to provide family and community supports that would build the protective factors for families within the identified communities.

Priority Level:	Priority Need:			
#1 – Entire	Reduce the number of verified findings of abuse for maltreatments including environmental hazards, family violence			
Circuit	threatens child, inadequate supervision, substance misuse and threatened harm.

Whole Child United Way of Central Florida 2010 Local Planning Team web-based technology that Advisor enables parents to do a self-Whole Child Advisor analysis of their needs, enables parents to connect electronically with essential services for their children. Facilitates creating a "no wrong door culture" among providers, and provides data on

program performance and priority service needs for the

community.

VII. MONITORING AND EVALUATION

Plans for monitoring progress and for determining the results of the prevention efforts.

VII.A. MONITORING PLAN IMPLEMENTATION

Partners who are tasked with implementation efforts will complete their sections of the monitoring report template and discuss their progress with the entire planning team quarterly at the Local Planning Team meetings. The conversations will serve to guide decisions about process implementation and performance. The information will be rolled up into an annual report to be submitted to the Circuit 10 Children's Cabinet and the Executive Office of the Governor.

VII. B ANNUAL PROGRESS REPORTING

The Local Planning Team will be a part of the quarterly discussions regarding each area of focus within the five-year plan. These discussions will be rolled up and incorporated into the annual progress report. The quarterly discussions will rotate each month so that the LPT will incorporate a discussion and review of each section of the 5-year plan at each monthly meeting.

VIII. BARRIERS

A description of barriers to the accomplishment of a comprehensive approach to the prevention of child abuse, abandonment, and neglect. \$39.001(8)(b)6.i

The process to analyze maltreatment data is restricted by what is recorded in FSFN. When attempting to get an accurate picture of the demographics of perpetrators and victims to assess for any disproportions compared to the general population, only using three race categories is insufficient. Also, since general population numbers were not provided, use of census data became difficult due to the difference in how race/ethnicity is broken down by the census in comparison to FSFN.

The program inventory data provided has served as a great starting point to assess service availability within our Circuit. Since it was received late in the planning process, however, it limited the circuit's ability to provide a true and accurate plan of service needs. The data will be incorporated locally into the Whole Child database from this point forward. Updates to service needs will be evaluated through the Whole Child Initiative for our Circuit, so that a more accurate picture will develop over time.

IX. <u>RECOMMENDATIONS</u>

Recommendations for changes that can be accomplished only at the state program level or by legislative action. \$39.001(8)(b)6.j

It is recommended that the state look at opportunities to streamline the race/ethnicity fields in FSFN to be better in line with census data or provide the population data according to the same specifications that will allow for a more accurate analysis.

PART 3 – PLAN FOR THE PROMOTION OF ADOPTION

I. STATUS OF ADOPTION PROMOTION

Status of adoption (including information concerning the number of children within the child welfare system available for adoption who need child-specific adoption promotion efforts) §39.001(8)(b)6.c

From the Data System – Federal Measures Note: These are county level data that cannot be rolled up to circuit level data.

- 1. Of the children adopted during the period July 2008 through June 2009, the percent who were adopted within 24 months of entering out of home care
- 2. Median length of stay for children whose adoptions were finalized total, by relatives, by foster parents and by recruited parents
- 3. Percent of foster children in care 17+ months who were adopted by the end of the period
- 4. Percent of children in foster care 17+ months who became legally free for adoption within six months
- 5. Of the children legally free for adoption on 1 July 2008, the percent adopted by 30 June 2009

Various Federal Performance Measures Related to Adoption

July 1, 2008 - June 30, 2009 Of children adopted, Median length of Of children Of children in out-of-Of children percentage adopted in stay for children legally free for in out-ofhome care 17+ months home care less than 24 months adopted. on July 1st/January adoption on July 1st, percent for 17+ 1st, percent who months on became legally free for adopted by June Measure adoption by December 30th July 1st, 31st/June 30th percent adopted by June 30th Circuit County Pct. Months Pct. Pct. Pct. 50.00% 21.2 Hardee 15.38% 14.29% 100.00% 10 Highlands 71.43% 19.6 0.00% 0.00% 0.00% 10 Polk 41.95% 26.9 38.44% 18.04% 59.47% Statewide 40.99% 30.99% 14.08% 26.8 47.47%

Source: Data Reporting Summary Report FY 0809 YTD

In 2008 numerous adoptive cases were transferred from Hardee and Highlands Counties to Polk County, which is reflected in the skewed percentages.

From the Data System - Other Measures

6. Number of adoptions finalized SFY 2008-2009

Count of Adoptions by County of Worker for FY 08/09

Circuit	County	Adoptions
10	Hardee	6
10	Highlands	7
10	Polk	182
	Statewide	3777

County is based on the county of the Courtesy Worker assigned to the child at the time of the adoption finalization. If not Courtesy Worker assigned, county is based on county of Primary Worker assigned to the case at time of adoption finalization.

Note that the distribution of adoptions by county may vary slightly from the data in the "Adopted By' tab due to different report run dates.

In 2008 numerous adoptive cases were transferred from Hardee and Highlands Counties to Polk County, which is reflected in the skewed percentages.

7. Percent of children adopted – by relatives, by foster parents and by recruited parents.

Children Adopted in FY 2008-2009 by County of Courtesy, then Primary Worker from Florida Safe Families Network Report Children Adopted by Month and Cumulative FY-List Report

Circuit	County	Foster Parents	Relatives	Recruited Parents
10	Hardee	33%	50%	17%
10	Highlands	14%	43%	43%
10	Polk	27%	37%	36%
	Circuit	27 %	38%	35%

County is based on the county of the Courtesy Worker assigned to the child at the time of the adoption finalization. If no Courtesy Worker assigned, county is based on county of Primary Worker assigned to the case at time of adoption finalization.

Note that the distribution of adoptions by county may vary slightly from the data in the "Adopted By' tab due to different report run dates.

Relatives accounted for the majority of finalized adoptions, followed by recruited parents and then licensed foster parents.

8. Number of children in out of home care for 12 months or more on 30 June 2009

Children in Out-of-Home Care Greater Than 12 Months on June 30, 2009

Circuit	County	Count
10	Hardee	23
10	Highlands	37
10	Polk	389
	Statewide	9652

County is based on the county of the primary worker assigned to the child on June 30, 2009

In 2008 numerous adoptive cases were transferred from Hardee and Highlands Counties to Polk County, which is reflected in high number of children in Polk County.

9. Of the children legally free for adoption on 30 June 2009, the length of time since becoming legally free for adoption [***State Plan Goal 2***]

Count of Children With Both Parents Rights Terminated by Length of Termination of Parental Rights as of June 30, 2009

Circuit	County	<12 Months	12 Months to <24 Months	24 Months to < 36 Months	36 Months or More
10	Hardee				
10	Highlands	2		2	
10	Polk	13	32	20	71
	Statewide	202	631	604	1,426

County is based on the county of the primary worker assigned to the child on June 30, 2009

In 2008 many adoptive cases were transferred from Hardee and Highlands Counties to Polk County, which is reflected in the high numbers of children listed in Polk County.

10. Time to finalization (median months) from removal to termination of parental rights and termination of parental rights to finalization – total, by relatives, by foster parents, and by recruited parents

Removal to termination of parental rights:

Circuit	Foster Parents	Relatives	Recruited Parents	Total
10	35.72	18.75	19.81	23.12

Termination of parental rights to Finalization:

Circuit	Foster Parents	Relatives	Recruited Parents	Total
10	9.65	8.89	9.34	9.23

The data shows that relative placements result in quicker permanency. Children in foster care have the longest amount of time from removal to termination of parental rights and from termination of parental rights to finalization.

11. Number of children with a goal of another planned permanent living arrangement as of 30 June 2009

Count of Children with a Permanency Goal of Another Planned Living Arrangement on June 30, 2009

Circuit	County	Count
10	Hardee	1
10	Highlands	10
10	Polk	87
	Circuit	98

County is based on the county of the primary worker assigned to the child on June 30, 2009.

12. The length of time between becoming legally free for adoption and adoption finalization for children adopted during SFY 2008-2009

[***State Plan Goal 1***]

Count of Children Adopted in FY 2008-09 By Length of Time of TPR

			12 Months to	24 Months to	36 Months to	48 Months or	
Circuit	County	<12 Months	<24 Months	< 36 Months	< 48 Months	More	Unknown
10	Hardee	6					
10	Highlands		1	1			
10	Polk	140	30	8		4	
	Statewide	2507	854	239	60	97	20

County is based on the county of the Courtesy Worker assigned to the child at the time of the adoption finalization. If not Courtesy Worker assigned, county is based on county of Primary Worker assigned to the case at time of adoption finalization.

The majority of adoption finalizations occur within 12 months of becoming legally free for adoption (date of Termination of Parental Rights). Due to appeals being filed, some children were unable to achieve permanency within the 12 month period.

From the Adoption Exchange System (800-96-ADOPT)

13. Number of children in out of home care available for adoption who need child-specific adoption promotion efforts as of 30 June 2009

Hardee: 2 Highlands: 6 Polk: 53 Total: 61

Many adoption cases were transferred from Hardee and Highlands Counties to Polk County, leaving Polk County with a high number of children needing specific adoption promotion efforts.

14. Number of sibling groups in out of home care available for adoption who need child-specific adoption promotion efforts as of 30 June 2009

Hardee: 1 Highlands: 1 Polk: 9 Total: 11

Many adoption cases were transferred from Hardee and Highlands Counties to Polk County, leaving Polk County with a high number of sibling groups needing specific adoption promotion efforts.

15. Time (in months) children have been waiting for adoption by age ranges and by race

Age Ranges by County:

_16.						
	<12	12 Months to	24 Months to	36 Months to	48 Months	Total
	months	<24 Months	<36 Months	<48 Months	or More	
0-3	8	0	0	0	0	8
4-7	7	3	1	0	0	11
8-12	13	5	0	0	5	23
13-17	7	1	1	1	9	19
Total	35	9	2	1	14	61

Polk	4	5	16	28	53
Circuit 10	4	7	20	30	61

Race by County:

	Black/African American	White	Other
Hardee	0	2	0
Highlands	4	2	0
Polk	23	29	1
Total	27	33	1

After a review of the local data, the Heartland for Children adoptions unit discussed issues relating to the timeliness of adoptions. Of particular concern are the length of stay and the number of children available for adoption for a period of 12 months or greater. Heartland for Children determined that these issues can best be resolved by reviewing the five most difficult cases with each Case Management Organization and by conducting Termination of Parental Rights consultations with Children's Legal Services to ensure adoption is the most appropriate and least restrictive goal. Barriers will be discussed with each Case Management Organization and during the weekly performance improvement call, an activity currently in place.

In addition, Heartland for Children has recently partnered with One Church One Child to develop strategies in recruiting from the faith-based community. And finally, Heartland for Children has

expanded our Adoption Gallery, which is called the Adoption Gallery of Central Florida, broadening our recruitment base. Through this effort we have also made significant investment in recruitment tools such as videographies, a medium in which these children can personally relay who they are, what their interests are, etc. This is especially effective for our older youth, as almost 50% of our youth available for adoption are 13 years of age and older. We believe that our children can be the best recruiters!									

II. CONTINUUM OF ADOPTION PROMOTION PROGRAMS

A continuum of programs necessary for a comprehensive approach to promotion of adoption (including brief descriptions of such programs and services) §39.001(8)(b)6.f

Note: The content of this section may be copied in whole and placed within the plan.

Adoption awareness efforts – Web-based, television, newspaper, magazine and radio public service announcements that provide a backdrop for general community awareness about the children in foster care who need adoptive families. The *Explore Adoption* campaign is pre-packaged and ready to be customized and used.

Targeted recruitment efforts – Focusing on specific groups of children and teens needing homes and identifying and targeting those communities most likely to adopt these children. Descriptions of common special needs of available children will lead to target populations that should be recruited; community and faith-based initiatives; incentive programs for foster and adoptive families to recruit others from their communities; advertisements, posters or flyers at places where foster and adoptive parents typically shop or visit; Web sites such as *Explore Adoption*; etc. The *Explore Adoption* campaign is pre-packaged and ready to be used.

Child-specific recruitment efforts – Locating and matching an identified waiting child with an approved adoptive family; media or materials describing and recruiting parents for an individual child; statewide and national adoption Web sites (e.g., *Explore Adoption*, Adoption Information Center, etc.); statewide and local heart galleries; radio, newspaper or television features; "passports" or brochures featuring the child's strengths and needs; etc.

Orientation for prospective adoptive parents – Meetings for staff to explain the adoption process and requirements for becoming an adoptive family; follow-up literature and guides; etc.

Assistance (navigating the system) for prospective adoptive parents – Consistent contact with prospective families, helpdesk for prospective families, guidebooks, brochures or paperwork that explains the process and steps that must be completed to become an approved adoptive parent, etc. *Explore Adoption* Web site has a FAQ page that would assist with this.

Pre-adoption training for prospective parents – Adoptive parent training (e.g., Model Approach to Partnership in Parenting) and family self-assessment to determine if adoption is a feasible plan for prospective adoptive family, adoption specific training after completion of the MAPP class, etc.

Pre-adoption information for "waiting" parents (i.e., family approved for adoption) — Referrals to local adoptive parent support groups; consultation, brochures or paperwork explaining the process and steps that must be completed once a child is identified as a possible match for approved adoptive families; adoption-specific training after receiving approval to adopt; etc.

Placement case management for "pre-adoptive" parents – Match staffing, placement supervision, child history disclosure, anticipated child-specific services and training needs, etc.

III. PROGRAMS CURRENTLY PROMOTING ADOPTION

Description of programs currently promoting adoption (including information on the impact, cost-effectiveness, and sources of funding) §39.001(8)(b)6.d

Please see Attachment 3 for a detailed catalogue of services provided in Circuit 10.

Heartland for Children uses the following methods to promote adoption in our circuit:

Program: Heart Gallery of Central Florida (5 gallery displays and website)
Target Audience: Responsible adults over the age of 18 who can consistently demonstrate

a positive pattern of behavior.

Counties Served: Polk, Hardee, and Highlands counties

Frequency: The website will be available at all times and the gallery displays will be

set up in venues throughout all 3 counties for 4-8 week time periods. We

will also display's set up at various community events.

Number of Families: Unlimited potential in the number of families we can target.

Impact Data: This data is not currently available; however we expect it to increase the

interest of adoption in our communities.

Cost Effectiveness: To be determined at end of each fiscal year.

Sources of Funding: These projects are funded by Heartland for Children and the State of

Florida Department of Children and Families

Type of Strategy: Increasing awareness of our need for local, racially diverse adoptive

families.

Program: MAPP (Model Approach to Partnership in Parenting) Training

Target Audience: Responsible adults over the age of 18 who can consistently demonstrate

a positive pattern of behavior.

Counties Served: Polk, Hardee, and Highlands counties

Frequency: These classes are offered on a quarterly basis, however will increase

frequency as the need arises.

Number of Families:

Impact Data:`

On an average, we serve approximately 20-25 families per class. This data is not currently available; however we anticipate matching

approximately 50 % of our families who successfully complete the

course.

Cost Effectiveness: The course is free to the participants; however the agency is providing a

facilitator and co-facilitator.

Sources of Funding: These courses are provided by Heartland for Children.

Type of Strategy: Increase number of families interested in the adoption of older children,

sibling groups, children with medical challenges.

Program: Adoption Specific Community Outreach

Target Audience: Responsible adults over the age of 18 who can consistently demonstrate

a positive pattern of behavior.

Counties Served: Polk, Hardee, Highlands counties

Frequency: Community outreach is done on a bi-monthly basis and adoption specific

events are currently held on a semi-annual basis.

Number of Families: This data is not currently available.

Impact Data: This data is not currently available, however we are hoping to reach

numerous families in our community.

Cost Effectiveness: Not available

Sources of Funding: These projects and activities are funded by Heartland for Children.

Type of Strategy: Increase number of families interested in the adoption of older children,

sibling groups, children with medical challenges.

*Other community partners that provide the Model Approach to Partnership in Parenting classes in our area are Florida Baptist Children's Home in Polk County.

*Neighboring counties: Orange, Osceola, and Hillsborough also offer Model Approach to Partnership in Parenting Training to families that may border on county lines

IV. PLAN PRIORITIES

A description, documentation, and priority ranking of local needs related to the promotion of adoption based upon the continuum of programs (see Part 3-II) and services (see Part 3-III). §39.001(8)(b)6.g

Priority Ranking of County-Level Needs Related to the Promotion of Adoption for Children in Need of Adoptive Families

County: Hardee

		Type(s) of Approach Warranted to Meet this Priority Need
Priority	County-Level Need with Description	 Adoption Awareness Targeted Recruitment Child-Specific Recruitment Orientation for Prospective Adoptive Parents Assistance for Prospective Adoptive Parents Pre-adoption Training for Prospective Adoptive Parents Pre-adoption Information for "Waiting" Parents Placement Case Management for "Pre-adoptive" Parents
1	To increase the number of prospective adoptive families.	Adoption Awareness Targeted Recruitment Child-Specific Recruitment Orientation for Prospective Adoptive Parents Assistance for Prospective Adoptive Parents Pre-adoption Training for Prospective Adoptive Parents Pre-adoption Information for "Waiting" Parents Placement Case Management for "Pre-adoptive" Parents
2	Reduce the wait time for children and/or sibling groups to get adopted. Reduce the rate of children in their teens that have been waiting for identified adoptive families for more than 12 months.	Adoption Awareness Targeted Recruitment Child-Specific Recruitment Assistance for Prospective Adoptive Parents

County: Highlands

V. PLAN OF ACTION FOR THE PROMOTION OF ADOPTION

Vision

Florida's highest priority is that children are raised in healthy, safe, stable, and nurturing families.

Mission

To serve as a blueprint that will be implemented to provide for the care, safety, and protection of all of Florida's children in an environment that fosters healthy social, emotional, intellectual, and physical development.

Outcome

All families and communities ensure that children are safe and nurtured and live in stable environments that promote well-being.

Goal 1

The percent of children adopted within 12 months of becoming legally free for adoption will increase from the fiscal year 2008-09 rate of 53.16 percent to 60 percent or higher by 30 June 2015.

Goal 2

The percent of children legally free for adoption who have been waiting for adoption since the date of termination of parental rights () for more than 12 months will be reduced from the June 2009 rate of 89.29 percent to les than 75 percent by 30 June 2015.

Note: Per data received as of June 30, 2009, Circuit 10 had 140 children available for adoption. 125 of those children had both parents rights terminated 12 months or more. 15 children had Termination of Parental Rights of less than 12 months.

Strategy 1

By 30 June 2015, Circuit 10 will use Faith Based Community Partners to help promote Adoption Awareness Opportunities.

Priority Level:	Priority Need:					
#1 for Circuit	To increase the number of prospective adoptive	ve families.

VI. MONITORING AND EVALUATION

VI.A. MONITORING PLAN IMPLEMENTATION

Partners who are tasked with implementation efforts will complete their sections of the monitoring report template and discuss their progress with the entire planning team quarterly at the Local Planning Team meetings. The conversations will serve to guide decisions about process implementation and performance. The information will be rolled up into an annual report to be submitted to the Circuit 10 Children's Cabinet and the Executive Office of the Governor.

VI. B ANNUAL PROGRESS REPORTING

The Local Planning Team will be a part of the quarterly discussions regarding each area of focus within the five-year plan. These discussions will be rolled up and incorporated into the annual progress report. The quarterly discussions will rotate each month so that the LPT will incorporate a discussion and review of each section of the 5-year plan at each monthly meeting.

VII. <u>BARRIERS</u>

A description of barriers to the accomplishment of a comprehensive approach to the promotion of adoption. \$39.001(8)(b)6.i

With the increased emphasis on Independent Living, there has been an increase in the number of teens not wanting to be adopted. We are also seeing that due to the cash incentive/benefit to delay adoption past the child's 16th birthday, there are more children being adopted past their 16th birthday.

Most of the adoption finalizations for Highlands and Hardee Counties were actually occurring in Polk County, which contributes to skewed data.

VIII. <u>RECOMMENDATIONS</u>

Recommendations for changes that can be accomplished only at the state program level or by legislative action. $\S39.001(8)(b)6.j$

It is recommended that a state-level analysis occurs surrounding the current Independent Living practices and incentives as compared to the state-level adoption initiatives to determine more cohesive strategies to accomplish these multiple goals.

Part 4 – PLAN FOR THE SUPPORT OF ADOPTIVE FAMILIES

I. STATUS OF SUPPORT OF ADOPTIVE FAMILIES

1. Number of adoptions that were dissolved and the reasons for the dissolutions based on those adopted children returning to foster care during the year.

Polk: 4 children returned to care after a finalized adoption; adoptive parents could not handle aggressive, ungovernable behaviors and some sexual acting out.

Hardee: 0

Highlands: 0

2. Quantity and quality of adoptive parent support groups

We have two adoptive support groups which meet monthly. One support group is led by an adoption competent mental health professional who provides information on therapy and behavior issues. The second support group provides monthly training and brings in guest speakers who specialize in foster and adoption issues relating to children and families.

3. Quantity and accessibility of adoption competent mental health professionals.

Heartland for Children uses two adoption competent mental health professionals. These professionals have recently become certified competent in adoption. These professionals provide services to families when they have primarily exhausted community providers who are unable to meet the needs of the children.

4. Educational opportunities available for adoptive parents.

Adoptive families are invited to attend annual seminars and monthly support groups which provide educational sessions.

5. Quantity, name, title and contact information of post adoption services counselors who provide information and referral, temporary case management for emotional support and educational advocacy.

Heartland for Children has one Post Adoption Specialist who provides information and referral, temporary case management for emotional support, and educational advocacy:

Kim Corpus, Permanency Specialist – Adoptions P.O. Box 1017 1239 E. Main St. Bartow, FL 33830 (863) 519-8900 After careful review and analysis of the data, the Heartland for Children adoptions unit discussed issues relating to the support of adoptive families. Of particular concern are the quantity and accessibility of adoption competent mental health professionals. Heartland for Children currently has two adoption competent mental health professionals who will become certified during the 2009-2010 fiscal year. Both professionals are located in Polk County. Heartland for Children will be expanding the adoption competency certification program to include mental health professionals from Highlands and Hardee Counties and increasing the number of adoption competent professionals in Polk County. The Heartland for Children adoptions unit agreed that adoptive parents also need additional training to help manage the behavior and mental health of their adopted children. Heartland for Children will implement a survey to determine the needs of the adoptive families. Heartland for Children will promote and provide additional training opportunities in Hardee, Highlands, and Polk Counties.

II. CONTINUUM OF ADOPTION SUPPORT PROGRAMS

Description of a comprehensive approach for providing post-adoption services (including information on sufficient and accessible parent and teen support groups; case management, information, and referral services; and educational advocacy) §39.001(8)(b)6.e

Adoptive parent and teen support groups – Small group opportunities for parents and teens that are accessible; configured and meeting as often as appropriate for the languages, cultures and needs of the participants in your communities; provision of support from umbrella organizations and qualified facilitators where appropriate (e.g., teen support groups); etc.

Education and training opportunities for adoptive parents – Education and training related to adoption issues, with an emphasis on strategies for handling loss, grief, relationship building, and "acting out" behaviors; skill-building to equip adoptive parents with the skills needed to meet the specific and developing needs of children (e.g., fetal alcohol, substance abuse, autism, etc.); providing adoption resource centers, lending libraries, newsletters, annual adoption conferences, and ongoing training and workshops for parents; etc.

Adoption competent education and mental health assistance services for adoptive families — Those providing education and therapeutic services have the basic knowledge and skills to effectively work with adoptive families and to empower adoptive parents and families to provide the environment necessary for ameliorating the effects of trauma (e.g., build relationships, improve relationships, develop nurturing and attachment, etc.); campaigns to recruit professionals to seek adoption competency; etc.

Case management services for adoptive parents and children – An intake process for families to return for needed services; designated case manager to respond to adopted children and families post-legal finalization; system to notify families of continued training, adoption workshops, and support group meetings, and resource guide that includes adoption-support information and service providers; etc.

III. PROGRAMS CURRENTLY SUPPORTING ADOPTIVE FAMILIES

Description of programs currently supporting adoptive families (including information on the impact, cost-effectiveness, and sources of funding) §39.001(8)(b)6.d

Please see Attachment 3 for a detailed catalogue of services provided in Circuit 10.

Heartland for Children works with the following agencies to provide support to adoptive families:

Program: University of Florida/Heartland for Children Behavior Analysis

Services

Target Audience: Adoptive families who need help managing behaviors of adopted

children

Counties Served: Polk, Hardee, and Highlands Counties

Frequency: This program is available at all times; however, there are times when

families must be put on a waiting list due to a high volume of families

utilizing the service

Number of Families: This data is not currently available; however, the program is at full

capacity

Impact Data: This data is nut currently available; however, many families who have

used the service have reported excellent results

Cost Effectiveness: Not available

Sources of Funding: Heartland for Children funds this service

Protective Factors: Families learn to use positive reinforcement and positive discipline, thus

reducing violence in the home

Type of Strategy: Teaching parents to use positive discipline to achieve desired behaviors

Program: Adoption Competent Mental Health Counseling Services, using

Marlynn Salzman and/or Elizabeth Craig

Target Audience: Adoptive families who need help managing behaviors of adopted

children

Counties Served: Polk, Hardee, and Highlands Counties

Frequency: This program is available at all times; however, clients are asked to first

use community providers before accessing the private providers.

Number of Families: This data is not currently available

Impact Data: This data is nut currently available; however, many families who have

used the service have reported excellent results

Cost Effectiveness: Not available

Sources of Funding: Heartland for Children funds this service

Protective Factors: Families learn to use positive reinforcement and positive discipline, thus

reducing violence in the home

Type of Strategy: Teaching parents about how abuse impacts children and giving those

parents ways to manage the behaviors

Program: Adoption Support Group meeting with Marlynn Salzman and/or

the Foster/Adoption Support Group

Target Audience: Adoptive families who need help managing behaviors of adopted

children

Counties Served: Polk, Hardee, and Highlands Counties

Frequency: This program is available at all times on a monthly basis

Number of Families: This data is not currently available

Impact Data: This data is nut currently available; however, many families who have

used the service have reported excellent results

Cost Effectiveness: Not available

Sources of Funding: Heartland for Children funds this service

Protective Factors: Families gain support from other adoptive families

Type of Strategy: Teaching parents about how abuse impacts children and giving those

parents ways to manage the behaviors

Program: Community Solutions: Multi-systemic Therapy

Target Audience: Adoptive families who need help managing behaviors of adopted

children

Counties Served: Polk, Hardee, and Highlands Counties

Frequency: This program is available at all times; however, only a limited number

of cases can be open at one time – others will be put on a waiting list

Number of Families: This has been recently implemented. Currently have five families being

referred for this service.

Impact Data: This data is nut currently available

Cost Effectiveness: Not available

Sources of Funding: Heartland for Children funds this service

Protective Factors: Family-based treatment to address the known determinants of serious

anti-social behaviors in adolescents with their families

Type of Strategy: Teaching parents about how abuse impacts children and giving those

parents ways to manage the behaviors

IV. PLAN PRIORITIES

A description, documentation, and priority ranking of local needs related to the support of adoptive families based upon the comprehensive approach (see Part 4-II) and services (see Part 4-III). §39.001(8)(b)6.g

V. PLAN OF ACTION FOR THE SUPPORT OF ADOPTIVE FAMILIES

Vision

Florida's highest priority is that children are raised in healthy, safe, stable, and nurturing families.

Mission

To serve as a blueprint that will be implemented to provide for the care, safety, and protection of all of Florida's children in an environment that fosters healthy social, emotional, intellectual, and physical development.

Outcome

All families and communities ensure that children are safe and nurtured and live in stable environments that promote well-being.

Goal 1

The number of adopted children who were returned to foster care (regardless of when the adoption was finalized) in the circuit will be reduced from 4 during the 2008-2009 fiscal year to less than 3 during the 2014-2015 fiscal year.

Strategy 1

By 30 June 2015, Circuit 10 will increase the number of adoptive parents who have received training and education so that they can better manage behavioral and/or mental health issues. Circuit 10 will increase the number of adoption competent mental health providers and the opportunities for families to receive services through adoption competent providers.

Priority Level: Priority Need:	
#1 – Entire Circuit Increase the number of adoptive	families who have received training in behavioral and/or mental health care and who access
local support groups for trainings	s and support.
Protective Factors to be Built by the Strategy:	Types of Approaches Warranted:
☑ Parental emotional resilience	☑ Adoptive parent and teen support groups
✓ Social connections	☑ Education and training opportunities for adoptive parents
Knowledge of parenting and child development	☑ Adoption competent mental health assistance services for parents and children
☑ Concrete support in times of need	☑ Case management services for adoptive parents and children
✓ Nurturing and attachment	

Objectives

Objective 1.1 Increase the promotion of training and educational opportunities
Objective 1.2 Increase the number and type of trainings available to adoptive families

Objective: 1.1 Increase the promotion of training and educational opportunities						
Action Steps	Measures/Benchmarks	Lead	Partners	Begin Date	End Date

VI. MONITORING AND EVALUATION

VI.A. MONITORING PLAN IMPLEMENTATION

Partners who are tasked with implementation efforts will complete their sections of the monitoring report template and discuss their progress with the entire planning team quarterly at the Local Planning Team meetings. The conversations will serve to guide decisions about process implementation and performance. The information will be rolled up into an annual report to be submitted to the Circuit 10 Children's Cabinet and the Executive Office of the Governor.

VI. B ANNUAL PROGRESS REPORTING

The Local Planning Team will be a part of the quarterly discussions regarding each area of focus within the five-year plan. These discussions will be rolled up and incorporated into the annual progress report. The quarterly discussions will rotate each month so that the LPT will incorporate a discussion and review of each section of the 5-year plan at each monthly meeting.

VII. BARRIERS

A description of barriers to the accomplishment of a comprehensive approach to the support of adoptive families. §39.001(8)(b)6.i

The quantity and accessibility of adoption competent mental health professionals in our circuit is limited.

VIII. RECOMMENDATIONS

Recommendations for changes that can be accomplished only at the state program level or by legislative action. §39.001(8)(b)6.j

It is recommended that the Appeal process becomes more of a priority to achieve permanency more timely. Also, recommended that subsidy continues for children who are 18 and are full-time high school students for at least 1 year to meet educational goals and to be more supportive of the family.

PART 5 – <u>ATTACHMENTS</u>

- 1. Local planning team membership and participation roster.
- 2. Local planning team schedule of meetings for 2009
- 3. Sweat Monkey Data for 5Yr Prevention Plan (program survey inventory)

Circuit Prevention and Permanency Programs and Services by County

Circuit: 10 County: Hardee

Primary Prevention - Adult Education

Organization: Agency for Persons with Disabilities

Program/Service: Supported Employment

Description:Through contracts with enrolled providers, individuals may receive supported employment services. This service provides assistance in locating employment, assistance with the interview and hiring process and on the job training until stabilization.

Availability: Individualized to person's needs as determined medically necessary

Impact Information:Individuals who are successful in supported employment arrangements have consistently higher numbers of personal outcomes than individuals in more segregated settings. By being successful in employment, individuals are able to become more independent and establish strong friendships and positive relationships in the workplace setting.

Cost-Effectiveness:Individuals seeking employment services have the job development, job placement and job stabilization services paid through vocational rehabilitation. The APD pays for phase 2 or followalong services. These services require minimal support to the person, fade over time as the individual is able to perform more job duties. This intermittent service is more cost efficient.

Funding Source(s): Federal Government State Government Private Not-for-profit - Has a principal fund or endowment; managed by a Board of Trustees & Directors; maintains or aids charitable, educational, religious, or other activities serving the public good; makes grants, primarily to nonprofit organizations

Target Audience(s): In order for APD to fund the employment services, the individuals must have either graduated from school with a regular diploma or have graduated with a special diploma at the age of 22. In order to be funded, the individual must have a desire to work.

Language(s): English Spanish

Organization: Center for Autism and Related Disabilities at USF

Program/Service: Consultation

Description:Provide customized intervention planning and education for families having a child diagnosed with autism or a related disability. Provide technical assistance to agencies, schools and businesses serving individuals with autism and related disabilities.

Availability: Weekly

Impact Information: Total services in 2008 was 969,768.

Cost-Effectiveness:Florida Estimated Savings Calculations Based on theGuttmacher-Frost Method (Table 1)The following is a detailed explanation of method used to calculate the estimated savings per pregnancy avoided by Florida's Family Planning Program as shown in Table 1.1. The total estimated family planning clients for 2006 was obtained from the 2006 Family Planning Annual Report for Florida (FPAR) -- 210,295 clients.2. The estimated pregnancies avoided per year per family planning client is 0.2034, which is obtained from the reference Frost report. This is the proportion of pregnancies avoided based on the estimated shift of women from less effective contraceptive methods (including no method) to more effective methods when family planning services become available.3. The number of family planning clients (Step 1) is multiplied by the proportion of pregnancies avoided per client (Step 2) to obtain the estimated number of 42,774 pregnancies.4. The estimated number of pregnancies classified into thre

Primary Prevention - Adult Education

Organization: Agency for Persons with Disabilities

Program/Service: Supported Employment

Description:Through contracts with enrolled providers, individuals may receive supported employment services. This service provides assistance in locating employment, assistance with the interview and hiring process and on the job training until stabilization.

Availability:Individualized to person's needs as determined medically necessary

Impact Information:Individuals who are successful in supported employment arrangements have consistently higher numbers of personal outcomes than individuals in more segregated settings. By being successful in employment, individuals are able to become more independent and establish strong friendships and positive relationships in the workplace setting.

Cost-Effectiveness:Individuals seeking employment services have the job development, job placement and job stabilization services paid through vocational rehabilitation. The APD pays for phase 2 or followalong services. These services require minimal support to the person, fade over time as the individual is able to perform more job duties. This intermittent service is more cost efficient.

Funding Source(s):Federal Government State Government Private Not-for-profit - Has a principal fund or endowment; managed by a Board of Trustees & Directors; maintains or aids charitable, educational, religious, or other activities serving the public good; makes grants, primarily to nonprofit organizations

Target Audience(s): In order for APD to fund the employment services, the individuals must have either graduated from school with a regular diploma or have graduated with a special diploma at the age of 22. In order to be funded, the individual must have a desire to work.

Availability: As needed

Impact Information: Angel Flight Southeast coordinates FREE air transportation for Florida's vulnerable population with medical and compelling humanitarian needs. Children and adults are flown on private planes for medical treatments, special needs summer camps, safety from domestic violence, relocation from disasters, and more. Today, 650 volunteer pilots donate their aircraft, fuel, time, and expertise, flying almost 2500 missions annually serving children and families who reside.

Cost-Effectiveness:This is possible because our volunteer pilots donate the use of their time, aircraft, fuel and expertise, Angel Flight Southeast is able to return \$5.00 in service for every \$1.00 received. This is truly a case of the gift is in the giving.

Program/Service: Family Planning Title X Program

Description:Administration of the federal Title X Family Planning grant is another responsibility of the IMRH unit. Family planning services are designed to reduce the number of unplanned or unwanted pregnancies, and to help women manage the timing and spacing of pregnancies

Availability: Weekly

Impact Information: Total services in 2008 was 969,768.

Cost-Effectiveness:Florida Estimated Savings Calculations Based on the Guttmacher-Frost Method (Table 1) The following is a detailed explanation of method used to calculate the estimated savings per pregnancy avoided by Florida's Family Planning Program as shown in Table 1.1. The total estimated family planning clients for 2006 was obtained from the 2006 Family Planning Annual Report for Florida (FPAR) -- 210,295 clients.2. The estimated pregnancies avoided per year per family planning client is 0.2034, which is obtained from the reference Frost report. This is the proportion of pregnancies avoided based on the estimated shift of women from less effective contraceptive methods (including no method) to more effective methods when family planning services become available.3. The number of family planning clients (Step 1) is multiplied by the proportion of pregnancies avoided per client (Step 2) to obtain the estimated number of 42,774 pregnancies.4. The estimated number of pregnancies classified into

Primary Prevention - Adult Education

Organization: Agency for Persons with Disabilities

Program/Service: Supported Employment

Description:Through contracts with enrolled providers, individuals may receive supported employment services. This service provides assistance in locating employment, assistance with the interview and hiring process and on the job training until stabilization.

Availability:Individualized to person's needs as determined medically necessary

Impact Information:Individuals who are successful in supported employment arrangements have consistently higher numbers of personal outcomes than individuals in more segregated settings. By being successful in employment, individuals are able to become more independent and establish strong friendships and positive relationships in the workplace setting.

Cost-Effectiveness:Individuals seeking employment services have the job development, job placement and job stabilization services paid through vocational rehabilitation. The APD pays for phase 2 or followalong services. These services require minimal support to the person, fade over time as the individual is able to perform more job duties. This intermittent service is more cost efficient.

Funding Source(s):Federal Government State Government Private Not-for-profit - Has a principal fund or endowment; managed by a Board of Trustees & Directors; maintains or aids charitable, educational, religious, or other activities serving the public good; makes grants, primarily to nonprofit organizations

Target Audience(s): In order for APD to fund the employment services, the individuals must have either graduated from school with a regular diploma or have graduated with a special diploma at the age of 22. In order to be funded, the individual must have a desire to work.

Description:Calls to the Poison Control hotline are answered by nurses, pharmacists, and physicians who have computerized access to the latest, in-depth poison assessment and management techniques. The poison specialists on staff are uniquely trained to assess, tria

Availability: 24 hours/ 7 days a week

Impact Information:In 2009, the Florida Poison Information Center Network responded to over 197,000 calls for assistance. Approximately 83% of calls involving a poison exposure were handled over the phone, without the need to refer callers to further medical care.

Cost-Effectiveness: When families call the toll free Poison Control Hotline instead of accessing unnecessary emergency care they save approximately \$1,600, the average cost of an ER visit for an injury or poisoning in Florida, according to a 2006 ACHA report. As mentioned earlier, the vast majority of exposures reported to poison centers can be safely and effectively managed over the phone. For families who utilize the educational information provided by the Poison Center to prevent poisonings at home, the potential savings for a hospital admission related to a poisoning averages \$13,000, according to a 2007 report from the Florida Office of Injury Prevention. For patients who do require hospitalization for a poison exposure, there is recent data that indicates that even these patients who engaged the poison center in their care had shorter hospitalizations than those who did not call. All in all, the free potentially lifesaving services of the poison control system save the public money by helping

Description:Calls to the Poison Control hotline are answered by nurses, pharmacists, and physicians who have computerized access to the latest, in-depth poison assessment and management techniques. The poison specialists on staff are uniquely trained to assess, tria

Availability: 24 hours/ 7 days a week

Impact Information:In 2009, the Florida Poison Information Center Network responded to over 197,000 calls for assistance. Approximately 83% of calls involving a poison exposure were handled over the phone, without the need to refer callers to further medical care.

Cost-Effectiveness: When families call the toll free Poison Control Hotline instead of accessing unnecessary emergency care they save approximately \$1,600, the average cost of an ER visit for an injury or poisoning in Florida, according to a 2006 ACHA report. As mentioned earlier, the vast majority of exposures reported to poison centers can be safely and effectively managed over the phone. For families who utilize the educational information provided by the Poison Center to prevent poisonings at home, the potential savings for a hospital admission related to a poisoning averages \$13,000, according to a 2007 report from the Florida Office of Injury Prevention. For patients who do require hospitalization for a poison exposure, there is recent data that indicates that even these patients who engaged the poison center in their care had shorter hospitalizations than those who did not call. All in all, the free potentially lifesaving services of the poison control system save the public money by helping

Organization: NAMI Polk County, Inc.

Program/Service: Polk County Mental Health Court

Description: The Polk County Mental Health Court is a collaborative program between the 10th Judicial Circuit and local social service agencies. Any participating agency can refer clients involved with the judicial system to mental health court which is a jail diversi

Availability: Weekly

Impact Information:The first 'graduating' class from Polk County Mental Health Court reported no new arrests during the first year after completing the program.

Cost-Effectiveness: The program is very cost effective as it keeps individuals with mental illness out of jail and in their own homes. If they have a job they are able to keep their job and if they need help finding a job they are offered services in locating a job. The relapse prevention piece offered by NAMI Polk County helps clients build a support network around them and helps them become aware of an impending relapse, thus preventing or shortening the relapse. Relapse prevention means staying out of the hospital and/or jail which is cost effective.

Funding Source(s): United Way of Central Florida State Government Corporate/Company Foundation - created & funded by private sector corporations Private Not-for-profit - Has a principal fund or endowment; managed by a Board of Trustees & Directors; maintains or aids charitable, educational, religious, or other activities serving the public good; makes grants, primarily to nonprofit organizations

Target Audience(s): Clients are charged with a crime in Polk County and have a documentable mental illness.

Organization: Florida Poison Information Center Network

Program/Service: Regional Poison Control Centers

Description:Calls to the Poison Control hotline are answered by nurses, pharmacists, and physicians who have computerized access to the latest, in-depth poison assessment and management techniques. The poison specialists on staff are uniquely trained to assess, tria

Availability: 24 hours/ 7 days a week

Impact Information:In 2009, the Florida Poison Information Center Network responded to over 197,000 calls for assistance. Approximately 83% of calls involving a poison exposure were handled over the phone, without the need to refer callers to further medical care.

Cost-Effectiveness: When families call the toll free Poison Control Hotline instead of accessing unnecessary emergency care they save approximately \$1,600, the average cost of an ER visit for an injury or poisoning in Florida, according to a 2006 ACHA report. As mentioned earlier, the vast majority of exposures reported to poison centers can be safely and effectively managed over the phone. For families who utilize the educational information provided by the Poison Center to prevent poisonings at home, the potential savings for a hospital admission related to a poisoning averages \$13,000, according to a 2007 report from the Florida Office of Injury Prevention. For patients who do require hospitalization for a poison exposure, there is recent data that indicates that even these patients who engaged the poison center in their care had shorter hospitalizations than those who did not call. All in all, the free potentially lifesaving services of the poison control system save the public money by helping

Description:Calls to the Poison Control hotline are answered by nurses, pharmacists, and physicians who have computerized access to the latest, in-depth poison assessment and management techniques. The poison specialists on staff are uniquely trained to assess, tria

Availability: 24 hours/ 7 days a week

Impact Information:In 2009, the Florida Poison Information Center Network responded to over 197,000 calls for assistance. Approximately 83% of calls involving a poison exposure were handled over the phone, without the need to refer callers to further medical care.

Cost-Effectiveness: When families call the toll free Poison Control Hotline instead of accessing unnecessary emergency care they save approximately \$1,600, the average cost of an ER visit for an injury or poisoning in Florida, according to a 2006 ACHA report. As mentioned earlier, the vast majority of exposures reported to poison centers can be safely and effectively managed over the phone. For families who utilize the educational information provided by the Poison Center to prevent poisonings at home, the potential savings for a hospital admission related to a poisoning averages \$13,000, according to a 2007 report from the Florida Office of Injury Prevention. For patients who do require hospitalization for a poison exposure, there is recent data that indicates that even these patients who engaged the poison center in their care had shorter hospitalizations than those who did not call. All in all, the free potentially lifesaving services of the poison control system save the public money by helping

Organization: Florida Poison Information Center Network

Program/Service: Regional Poison Control Centers

Description:Calls to the Poison Control hotline are answered by nurses, pharmacists, and physicians who have computerized access to the latest, in-depth poison assessment and management techniques. The poison specialists on staff are uniquely trained to assess, tria

Availability: 24 hours/ 7 days a week

Impact Information:In 2009, the Florida Poison Information Center Network responded to over 197,000 calls for assistance. Approximately 83% of calls involving a poison exposure were handled over the phone, without the need to refer callers to further medical care.

Cost-Effectiveness: When families call the toll free Poison Control Hotline instead of accessing unnecessary emergency care they save approximately \$1,600, the average cost of an ER visit for an injury or poisoning in Florida, according to a 2006 ACHA report. As mentioned earlier, the vast majority of exposures reported to poison centers can be safely and effectively managed over the phone. For families who utilize the educational information provided by the Poison Center to prevent poisonings at home, the potential savings for a hospital admission related to a poisoning averages \$13,000, according to a 2007 report from the Florida Office of Injury Prevention. For patients who do require hospitalization for a poison exposure, there is recent data that indicates that even these patients who engaged the poison center in their care had shorter hospitalizations than those who did not call. All in all, the free potentially lifesaving services of the poison control system save the public money by helping

Funding Source(s): Federal Government State Government Local Government

Target Audience(s):There are no eligibility requirements for callers. Target audiences include parents and caregivers of small children, those who teach child safety, and medically underserved populations within the state.

Language(s):Poison control centers offer non-English speaking callers telephone translation services via the A
