Part 1 – Introduction

In accordance with state law (§39.001, Florida Statutes), this five-year *Florida Support of Adoptive Families Plan: July 2010 – June 2015* provides for the support of families who have adopted from Florida's child welfare system. The vision, mission, overarching goal and desired results of the plan are:

Vision

Florida's highest priority is that children are raised in healthy, safe, stable, and nurturing families.

Mission

To serve as a blueprint that will be implemented to provide for the care, safety, and protection of all of Florida's children in an environment that fosters healthy social, emotional, intellectual, and physical development.

Overarching Goal

All families and communities ensure that children are safe and nurtured and live in stable environments that promote well-being.

Desired Result of Plan Implementation

Support of Adoptive Families – By 30 June 2015, the annual number of adopted children who are returned to foster care (regardless of when the adoption was finalized) will be reduced from the State Fiscal Year 2008-2009 number of 98.

The *Florida Support of Adoptive Families Plan: July 2010 – June 2015* was developed by the Governor's Office of Adoption and Child Protection with the assistance of the Governor's Child Abuse Prevention and Permanency Advisory Council, its membership agency and organization staff members and five workgroups with statewide representation. *Part 2* of this plan provides a status report on adoption support-related services in Florida. *Part 3* the continuum of programs and services necessary for a comprehensive approach to the support of adoptive families. *Part 4 – Plans of Action for the Support of Adoptive Families* encompasses three strategies and nine objectives to be implemented over the next five years. *Part 5* provides a glimpse of the work and plans of the 20 circuits for the next five years to support adoptive families. The full text of the circuit plans is provided in Appendix I.

Plan Strategies and Objectives for the Support of Adoptive Families

Support of Adoptive Families Strategy 1: Strengthen Florida Service Systems to Better Support Adoptive Families to Meet the Needs of Their Adopted Children and Youth. By 30 June 2015, the State of Florida will have implemented post adoption services that provide for mental health, emotional, physical and other needs of adoptive families.

Support of Adoptive Families Strategy 1 Objectives:

- Information and Support for Adoptive Families. By 30 June 2015, the State of Florida will have implemented fully the state adopted Customer Service Protocol for supporting families with adopted children.
 [Leads: Department of Children and Families and Community Based Care Lead Agencies]
- **1.2** Adoption Competent Professionals. By 30 June 2015, the State of Florida will have increased the number and accessibility of adoption competent mental health, education, and child welfare professionals, so that sufficient numbers are accessible as defined by each circuit.

[Leads: Department of Children and Families and Community Based Care Lead Agencies]

1.3 Post Adoption Services Counselors. By 30 June 2015, the State of Florida will have increased the number of post adoption services counselors in Florida so that each Community Based Care Lead Agency has a sufficient number (a minimum of one full-time staff person) dedicated to responding to the needs and inquiries of adoptive families after finalization.

[Leads: Department of Children and Families and Community Based Care Lead Agencies]

Please Note: Adoption Services Counselors are staff persons designated to respond to the request and service needs of adoptive parents. The response to requests and service needs shall include, at a minimum, information and referrals, temporary case management, assistance with subsidy and Medicaid issues, and assistance in establishing and maintaining one or more adoptive parent support groups.

Support of Adoptive Families Strategy 2: Provide Information and Supports to Adoptive Families. By 30 June 2015, the State of Florida will have provided information and supports to Florida adoptive families on ways to build competence in meeting the needs of their adopted children and youth.

Support of Adoptive Families Strategy 2 Objectives:

2.1 Adoption Support Groups. By 30 June 2015, the State of Florida will have increased the number and sustainability of quality adoptive parent and youth support groups so that each community has a local support group or, in rural communities, at least a quarterly newsletter or warm-line that informs adoptive parents of nearby support groups and upcoming educational opportunities and information related to the *Five Protective Factors*. [Leads: Department of Children and Families and Community Based Care Lead Agencies]

- 2.2 Education Opportunities for Adoptive Parents. By 30 June 2015, the State of Florida will have increased the number and accessibility of quality educational opportunities for adoptive parents that include education related to the *Five Protective Factors*, caring for the needs of adoptive children, and supporting the needs of adoptive families. [Leads: Department of Children and Families and Community Based Care Lead Agencies]
- **2.3** Faith-Based and Community-Based Efforts. By 30 June 2015, the State of Florida will have provided information and resources to promote and build efforts by faith-based and community-based systems to provide family and community supports that would build the *Five Protective Factors* in Florida's adoptive families. [Lead: Executive Office of the Governor]

Support of Adoptive Families Strategy 3: Monitor and Evaluate Plan Implementation. By 30 June 2015, leadership of plan implementation will have monitored and annually assessed the progress and effectiveness the plan-based initiatives.

Support of Adoptive Families Strategy 3 Objectives:

- **3.1 Instrumentation and Procedures Design.** By 30 March 2011, the State of Florida will have created procedures and instrumentation for use by the plan workgroups for monitoring and annually reviewing progress. [Lead: Executive Office of the Governor]
- **3.2 Progress Monitoring.** By 30 June 2015, the State of Florida will have implemented an ongoing monitoring of plan implementation progress and used the findings to refine the action plans for future implementation. [Lead: Executive Office of the Governor]
- **3.3 Annual Review and Assessment.** By 30 June 2015, the State of Florida will have implemented annual progress reviews and used the findings to refine the strategies and objectives for future implementation. [Lead: Executive Office of the Governor]

Part 2 – Status of Support of Adoptive Families

Dissolutions of Adoptions

The Department of Children and Families Office of Family Safety submitted data provided by the Circuits on the number of adoptions that were dissolved and the reasons for the dissolutions based on those adopted children returning to foster care during the year. There were 98 adoption dissolutions reported across the state during State Fiscal Year 2008-2009. The numbers shown in the table below are conservative and duplicated counts. They are conservative in that these numbers reflect only those children, under the age of 18 for whom the Maintenance of Adoption Subsidy was terminated during the state fiscal year. Additionally, the two most prominent reasons for dissolutions of adoption were behavioral issues and mental health issues. Because these are so closely tied, many of the reported dissolutions cited both reasons. In those cases, the counts are provided for both.

Slightly over a fifth (21.4%) of the dissolutions occurred in Circuit 4 and 14.2% occurred in Circuit 9. Circuit 14, 16 and 20 had no dissolutions. The primary reason identified by the Circuits for dissolution was behavioral and/or mental health issues (86.7%). Slightly over a tenth (11.2%) of the dissolutions were said to be due to mental health issues but two of the issues in Circuit 6 were also complicated by the child having medical issues that the adoptive parents were not able to manage. There were no reasons identified for 13.3% of the dissolutions (Circuits 11 and 4). Five dissolutions in Circuit 5 were identified as behavioral issues along with Department of Juvenile Justice issues. One dissolution in Circuit 9 was identified as a result of behavioral issues along with the inability of the child to bond with the family. Three dissolutions in Circuit 7 were identified as behavioral placing other children in the home at risk. Individual circuit response of number of dissolutions and reasons cited is reflected below.

	Number of	Reasons Cited for the Dissolutions (Duplicated Counts)					
Circuit	Dissolutions (Unduplicated Counts)	Behavioral Issues	Mental Health Issues	Other	Not Reported		
1	3	3					
2	3		3				
3	2	2	2				
4	21	18	19		2		
5	8	5	3	5-DJJ issues

Table 1. Dissolutions by Circuit and Reasons Cited

Status of Support of Adoptive Families

To assess the status of support of adoptive families, the Department of Children and Families Office of Family Safety submitted data provided by the circuits on the number of adoptive parent support groups, number of adoption competent mental health professional and number of post adoption services counselors who provide information and referral, temporary case management for emotional support, and educational advocacy. These data were checked against the numbers submitted in the local five-year plans for the support of adoptive families. Where discrepancies were found between the two sets of information, the circuits were contacted to assist with providing the final numbers used below.

Adoptive parent and youth support groups provide small group opportunities for adoptive parents and youth that are accessible; configured and meeting as often as appropriate for the languages, cultures and needs of the participants in your communities; provision of support from umbrella organizations and qualified facilitators where appropriate (e.g., teen support groups); etc.

The Circuits reported 37 adoptive parent support groups across the state. Of these, at least three were identified as struggling, regrouping or new. Additionally, two circuits reported three adoptive children support groups were reported (two in Circuit 9 and one in Circuit 17). Circuits 2, 3 and 8 reported that they did not have any adoptive parent support groups. One of the four groups reported in Circuit 12 is an online support group. Two adoptive parent associations were reported for Circuit 6 and were not included in the total. The support group in Circuit 20 meets quarterly.

Circuit	Adoptive Parent Support Groups	Comments
1	2	One well attended, one not well attended
2	0	
3 & 8	0	
4	1	
5	2	
6	2	Also, 2 foster/adoptive parent associations
7	1	
9	2	Also, one for children 5-12, one for children 12-18
10	2	
11 & 16	4	2 active, one attempting to regroup, one starting
12	6	4 Foster/adoptive parent association support groups, 1 church, 1 online support group
13	3	
14	2	
15	3	
17	2	Also, one child/teen group that meets quarterly
18	3	
19	1	
20	1	Meets quarterly
Statewide Total	37	

Table 2. Quantity of Adoptive Parent Support Groups by Circuit

Over 10,000 children have been adopted from the child welfare system in just the last three years alone. Research has shown that essential to family resilience are social connections, knowledge of parenting and of child and youth development, parental resilience, and concrete support in times of need. All of these could be made available to families through adoptive parent support groups. There are a total of 37 support groups across the State of Florida as of June 2010, which is not sufficient to meet the needs of Florida's adoptive families.

Adoption competent mental health professionals are mental health professionals that have completed the Rutgers *Adoption Competency* or equivalent curriculum and provide accessible education and therapeutic services for adoptive families.

Fifty-seven adoption competent mental health professionals were identified in Circuits 1, 3, 4, 7, 8, 9, 13, 14, and 18. Eighteen of the adoption competent mental health professionals are located in Circuit 9. In Circuit 11 one group (number of individuals not reported) has completed the course and are awaiting certification and one group (number of individuals not reported) is getting ready to start. In Circuit 20 no mental health professionals were identified as having been trained in adoption competency but 27 individuals indicated that they "wanted to learn" about adoption-competent practice.

Circuit	Quantity of Adoption Competent Mental Health Professionals	Comments				
1	7					
2	0	12 soon				
3 & 8	5					
4	6					
5	0					
6	0					
7	4					
9	18					
10	0	Two will be certified in FY 09-10				
11 & 16	0	One group has completed course and awaiting certification, one group going to start				
12	0	One trainer (training will occur in March 2010 for 14 staff)				
13	7	Of these 7, only one accepts Medicaid				
14	5	Two more will begin training soon				
15	0	Six identified to be trained				
17	0	18 professionals have been accepted into the program				
18	5	25 begin training in Jan 2010. 25 begin training in March 2010				
19	0	One representative sent to adoption competent "train the trainer"				
20	0	27 professionals wanted to learn about adoption-competent practice				
Statewide Total	57					

Table 3. Quantity of Adoption Competent Mental Health Professionals by Circuit

Again, over 10,000 children have been adopted from the child welfare system in just the last three years alone. Having a total of 57 adoption competent mental health professionals across the State of Florida as of June 2010 is not sufficient to meet the needs of Florida's adoptive families. The State of Florida and its partners will have to increase the number and accessibility of adoption competent mental health professionals to meet the therapeutic needs of Florida's adoptive children and families.

A post adoption services counselor is a staff person designated to respond to the requests and service needs of adoptive parents. The response to requests and service needs includes, at a minimum, information and referrals, temporary case management, assistance with subsidy and Medicaid issues and assistance in establishing and maintaining one or more adoptive parent support groups. Across the state twenty post adoption counselors were identified by the circuits. Circuit 1 reported that their adoption support team has two post adoption services counselors, a supervisor and a family support worker. Circuits 2, 3, 8, 12, 13, 14 and 15 reported no post adoption services counselors were available to assist adoptive families.

Circuit	Quantity of Post Adoption Services Counselors	Comments
1	2	The Children's Home Society Adoption Support Team has two post adoption services counselors, a supervisor and a family support worker.
2	0	Florida Baptist Children's Home and Children's Home Society
3 & 8	0	
4	2	
5	1	
6	1	
7	1	
9	1	
10	2	
11 & 16	3	Provide both pre and post services.
12	0	
13	0	A separate center has one full time staff member providing services.
14	0	Responsibilities divvied out.
15	0	
17	1	
18	4	
19	1	Provide both pre and post services.
20	1	One more position is vacant.
Statewide Total	20	

Table 4. Quantity of Post Adoption Services Counselors by Circuit

Again, families have adopted over 10,000 from the child welfare system with in just the last three years alone. The State of Florida and its partners will have to increase the capability of circuits to provide accessible and appropriate information and referrals, temporary case management, assistance with subsidy and Medicaid issues and assistance in establishing and maintaining one or more adoptive parent support groups for these and the families who have come before them.

Part 3 – Continuum of Programs and Services

During the last three years, over 10,000 children have been adopted from Child Welfare in Florida. All of the families that have adopted these children as well as those who have come before, have taken on an awesome responsibility for raising children who have experienced profound trauma in their lives. It is incumbent upon the State of Florida and all of its partners to ensure that these families and these children have the emotional and physical supports necessary for their homes to be nurturing and stable, and capable of assisting with the healing that will be necessary for the lifetimes of these children and youth in order for them to grow into responsible and supportive adults.

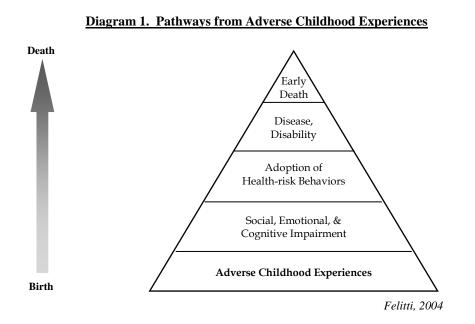

Post-adoption support refers to services and assistance offered to families after the legal finalization of their adoption. Agencies have referred to these as "services to closed cases". Although there is not an open case in dependency court or within an adoption agency, the on-going needs of the adopted child continue. The fundamental goal is to ensure that children remain stable in their adoptive families and that with supportive services and assistance there will be no adoption dissolutions. Post-adoption services are provided by lead agencies, sub-contractors, and/or fee-for-service staff members. Services identified to support the adoptive placement include: case management, financial assistance, medical coverage, education and counseling, support groups, respite care, and others.

Adoptive parents and adoption practitioners have identified the need for a coordinated effort between child welfare, mental health, and educational professionals regarding the provision of post-adoption services for our children and their adoptive families. Research studies have provided data suggesting that adoptive parents and adoption practitioners identified a significant need for educational professionals to be knowledgeable about adoption issues. School issues (including academic performance, behavior management, educational supports, social skills, etc.) are a significant concern for adopted children. Adoptive families often struggle in advocating for children and navigating the school system.

Adverse Childhood Experiences

Recent research has identified the physical and mental conditions increasingly being associated with adverse childhood experiences, such as physical abuse, sexual abuse, and neglect. Neurologic imaging and traumatology studies have delineated the chronic physiologic and structural changes that occur after chronic stress and abuse (De Bellis, 2005; Eluvathingal et al., 2006). Chronic stress and abuse are also associated with specific disease processes and poor mental health outcomes in adults. These adverse childhood experiences (ACES) have been associated with increased rates of teen pregnancy, promiscuity, depression, hallucinations, substance abuse, liver disease, chronic obstructive pulmonary disease, coronary artery disease, and identifiable permanent changes in brain structure and stress hormone function (Anda et al., 2002; Dube et al., 2003; Felitti et al., 1998; Middlebrooks et al., 2008). The National Research Council (1993) and others studied clinical conditions associated with abuse and neglect, including depression, posttraumatic stress disorder, and conduct disorders, all of which compound any direct physical injuries inflicted on individual children. Associated trauma and increased risk of low academic achievement, drug use, teen pregnancy, juvenile delinquency, and adult criminology were also noted. Strong and resilient families should be recruited to care for Florida's children who have lost their homes and encountered an array of adverse childhood experiences through losing their homes and biological families through moving through child welfare, the court system, foster care and ultimately adoption.

The diagram below represents the proposed pathways from adversity (i.e. adverse childhood experiences) to disease and death based upon the research into adverse childhood experiences.

A population-based analysis of over 17,000 middle-class American adults undergoing comprehensive, bio-psychosocial medical evaluations indicated that three common categories of addiction are strongly related in a proportionate manner to several specific categories of adverse experiences during childhood. This suggests that the basic cause of addiction may be predominately experience-dependent during childhood rather than substance-dependent. Adverse childhood experiences are surprisingly common among substance abusers. Addiction may be best viewed as an understandable, unconscious, compulsive use of psychoactive materials in response to stressful, harmful childhood experiences (Felitti, 2004). Our adoptive families will require much preparation and assistance in creating and sustaining homes for children who may have the predisposition to addictions as a result of their childhood experiences. It is incumbent upon the State of Florida and all of its partners to ensure these families and these children have the emotional and physical supports necessary for the lifetimes of these children and youth in order for them to grow into responsible and supportive adults.

The Five Protective Factors

Research conducted by the Center for the Study of Social Policy found that there are *Five Protective Factors* that make a difference for families. When families experience the stressors that are highly correlated with child maltreatment, some families maltreat their children and others do not. The Center found that in the homes that do not maltreat their children, although they are experiencing the same stressors, the difference in these homes is the presence of *Five Protective Factors*. These *Five Protective Factors* reduce the incidence of child abuse and neglect by providing parents with what they need in order to parent effectively, even under stress.

By building relationships with families, programs can recognize signs of stress and build families' protective factors with timely, effective help. The *Five Protective Factors* are:

- Nurturing and Attachment/Social and Emotional Competence of Children A child's ability to interact positively with others, to self-regulate, and to effectively communicate his or her emotions has a great impact on the parent-child relationship. A child's social and emotional development is highly dependent on the quality of a young child's primary relationships. How caregivers respond to children's emotional expression profoundly influences how they learn to process, understand, and cope with such feelings as anger, happiness, and sadness. Promoting positive behavior and responses in children could strengthen parent-child relationships.
- Knowledge of Parenting and of Child and Youth Development Extensive research links healthy child development to effective parenting. Children thrive when parents provide not only affection, but also respectful communication and listening, consistent rules and expectations, and safe opportunities that promote independence. Successful parenting fosters psychological adjustment, helps children succeed in school, encourages curiosity about the world, and motivates children to achieve.
- **Parental Resilience** Parents who can cope with the stresses of everyday life, as well an occasional crisis, have resilience; they have the flexibility and inner strength necessary to bounce back when things are not going well. Multiple life stressors, such as a family history of abuse or neglect, health problems, marital conflict, or domestic or community violence—and financial stressors such as unemployment, poverty, and homelessness—may reduce a parent's capacity to cope effectively with the typical day-to-day stresses of raising children.
- Social Connections Parents with a social network of emotionally supportive friends, family, and neighbors often find that it is easier to care for their children and themselves. Most parents need people they can call on once in a while when they need a sympathetic listener, advice, or concrete support. Research has shown that parents, who are isolated, with few social connections, are at higher risk for child abuse and neglect.
- Concrete Supports for Parents Partnering with parents to identify and access resources in the community may help prevent the stress that sometimes precipitates child maltreatment. Providing concrete supports may also help prevent the unintended neglect that sometimes occurs when parents are unable to provide for their children.

Note: While this plan addresses ways to build the *Five Protective Factors* in Florida families through multiple avenues, it will be incumbent on the State's natural and specialized service systems to ensure that accessible quality concrete supports are available for Florida families in times of need.

Having such resilience is a family characteristic that will be sought by our Florida systems that recruit adoptive parents. In addition, the *Five Protective Factors* will be incorporated into post-adoption support services and educational opportunities for adoptive parents to help them build and sustain the *Five Protective Factors* in themselves and in their families. The State of Florida will also provide information and resources to promote and build efforts by faith-based and community-based systems to provide family and community supports that will build the *Five Protective Factors* in Florida's adoptive families.

Adoption Competence

Adoption competence training for mental health professionals is necessary to ensure that those providing therapeutic services have the basic knowledge and skills to effectively work with adopted children and to support their adoptive parents. Again, the goal is reduce the number of adoption dissolutions. The Department of Children and Families worked with Rutgers University to bring an adoption competency training and certification program to the State of Florida. Currently it is offered through St. Petersburg Community College and as a "Train the Trainer" program for consistency and professional credentialing. The train-the-trainer spans a 5 day period, totaling 42 hours. The training curriculum includes the following seven modules:

- The Psychology of Adoption
- Life Cycle Experiences and Developmental Stages of Adopted Children
- Issues in the Adoption of Older Children
- Attachment-Focused Therapy for Adoptive Families
- Family-Focused Therapy
- Management of Behavior Problems and Discipline for Traumatized Children
- Individual Therapy for Adopted Children, Teens and Families

The early anecdotal findings from these sessions include the mental health professionals stating that they "didn't know what they didn't know" and that their practices and assessments will change on the basis of this new knowledge.

Based upon early results, adoption competence training will be made available over the course of the next five years for mental health professionals and for educators who would avail themselves of the training. Additionally, the Department of Children and Families will offer this training to its child welfare professionals, recognizing the need for their better understanding the issues confronting children who have been served in the Child Welfare system as well as the issues confronting the families who are caring for these children.

Adoption competence training for mental health and other professionals is necessary to ensure that those providing therapeutic and other services have the basic knowledge and skills to effectively work with adopted children and to support their adoptive parents.

The following criteria were developed by Casey Family Services to describe the prerequisites for adoption competence for a mental health, education or child welfare professional:

- Knowledge that adoption is one way to form a family and is a life-long process with remarkably universal experiences as well as unique individual feelings and perceptions.
- Recognition that parenting relationships and family connections are the single most therapeutic element in the life of a child over time.
- Ability to understand that there are common developmental challenges in the experience of adoption.
- Willingness to help families promote secure attachments and healthy relationships no matter what the developmental challenges.
- Ability to address adoption from a culturally competent family perspective: understanding the power of the triad of family relationships.

- Willingness to "balance the power" with adoptive families, collaborating with them as team players and colleagues toward the mutual goal of helping a child to heal.
- Willingness to avoid blaming adoptive parents for their children's behaviors, reframe everyone's goal as being "part of the solution".
- Ability to help adoptive parents honor their child's past and talk with their child about separation, loss and feelings about birth parents.
- Ability to support adoptive parents in assuming parental entitlement and authority, fully empowering them as decision-makers and "experts" when it comes to their child and family.
- Recognition of and respect for the characteristics and skills that make adoptive families successful and assist families in developing and practicing those skills.
- Willingness to work and provide in-home and outreach services to families that meet them "where they are".
- Recognition that temporary out-of-home treatment may be essential (not a "failure" in the adoption) and that the focus is to work to keep the child and family connected and reunified as soon as possible.

These adoption competency prerequisites serve as a model in identifying topics for continued education and in establishing successful post-adoption programs. Professionals and adoptive parents greatly benefit from education and training related to adoption issues, with an emphasis on strategies for handling loss, grief, relationship building, and "acting out" behaviors. Continued parent training must be included as a post-adoption support to equip adoptive parents with the skills needed to meet the developing needs of children. Various types of parent training options include providing adoption resource centers, lending libraries, newsletters, annual adoption conferences, and ongoing training and workshops for parents.

Adopted children and their adoptive parents continue to need mental health services beyond the adoption finalization. Mental health services help children (and their adoptive families) cope with their childhood, foster care and adoption experiences, and the behavioral aftermath of these experiences. Services include individual counseling, family counseling, medication management, educational supports, and residential treatment. Intervention should be tailored to the specific emotional and behavioral needs of children in the child welfare system (such as reactive attachment disorder). Research studies have provided data suggesting that adoptive parents and adoption practitioners have a significant need for mental health practitioners to be knowledgeable about adoption issues. Mental health practitioners who are adoption competent will provide the most successful treatment. As the legal status and the responsibility of the child shifts to the adoptive family, the adoptive family should have the assistance, subsidy, and mental health coverage to access adoption competent services.

Adopted children are more likely than biological children to have special healthcare needs, such as moderate or severe health problems, learning disabilities, developmental delays or physical impairments, and other mental health difficulties. The results suggest that, even though adopted children may have poorer health than biological children, their parents may be doing more to ensure that they have needed health care and supportive environments. Post adoptive supportive services provide information, community and specialized supports, and referrals to assist these adoptive parents with addressing the special needs of their adopted children.

Post Adoption Supports

Successful post-adoption programs require the recognition that adoption is a life long process, the understanding that there will be life long challenges associated with adoption, and the commitment to all adoptive families that supportive assistance will be available when needed. Agencies should have in place:

- An intake process for families to return for needed services,
- A designated post adoption services counselor to respond to adopted children and families post-legal finalization,
- Systems to notify families of continued training, adoption workshops, and support group meetings, and
- A resource guide that includes adoption information and service providers.

Every circuit and community based care agency providing adoption services should provide for support groups for their adoptive families. These support groups could be:

- Held in conjunction with a foster parent association or support group.
- Led by a parent or by an agency staff liaison.
- Operated through a contract with another program (but still connected to adoption).
- Supported by a newsletter, warm line, or Web site.

A secondary benefit of an adoption support group is that participation provides the venue for building social connections and relationships that could lead into opportunities for respite care. In addition to agencies, support groups and assistance can be offered by faith-based and community-based partners.

Florida's Task Force on Child Protection

In 2008, the Department of Children and Families convened a Task Force on Child Protection. In July 2008, the Task Force accepted the recommendations of its Permanency and Placement Stabilization Workgroup for proposed time frames changes to the case plan statutes and minimum standards for provision of post-adoption support services. These recommended minimum standards for provision of post-adoption support services include:

Minimum Standards for Provision of Post Adoption Services

- (1) A sufficient number of accessible adoptive parent support groups that meet at least once a month with a community based-care liaison assigned to each group to assist, when needed, in maintaining the groups over time. An adoptive parent support group for Spanish-speaking adoptive parents is necessary in some areas. In rural areas where there are insufficient numbers of adoptive families for a support group, a monthly or quarterly newsletter may be established and maintained.
- (2) At the time of finalization, the adoptive parents must be provided a letter or document that explains the process for accessing post-adoption services, including specific contact information when a family has questions or concerns about subsidy, Medicaid, or services.
- (3) One or more post-adoption services case managers are needed to temporarily assist adoptive parents. At a minimum, temporary case management is needed for emotional support, assistance in accessing services, including medical subsidy funds, changes to

subsidy or Medicaid and information and referral services. Beginning in September, cases providing post-adoption services will be documented in Florida Safe Families Network (the state data system) by the assigned case manager and reports of this workload will be available.

- (4) A process is in place to inform adoptive parents of training/ educational opportunities occurring locally, in the state of Florida and nationally related to adoption or specific behavioral, mental health, or educational.
- (5) A process is established that allows a post-adoption case manager to assist a child protective investigator with an investigation that involves an adopted child. The assistance may include an assessment for services related to the needs of the child, other children in the family or the adoptive parents.
- (6) With the assistance of an adoption competent facilitator, adopted teen support groups may be established to assist adopted teens and teens waiting for adoption to discuss and handle adolescent issues related to the adoption process.

The Governor's Office of Adoption and Child Protection recommends that these minimum standards recommendations be addressed by the Department of Children and Families with incentives for implementation by the community based care providers. Implementation would improve and streamline timeframes for the adoption of children. Additionally, implementation of these recommendations would better prepare parents to adopt the children waiting for forever families as well as better support those families after adoptions are finalized. This plan reflects five-year strategies to put these in place to support Florida's adoptive families.

Continuum of Programs and Services Necessary for a Comprehensive Approach to the Support of Adoptive Families

Adoptive parent and teen support groups – Small group opportunities for parents and teens that are accessible; configured and meeting as often as appropriate for the languages, cultures and needs of the participants in your communities; provision of support from umbrella organizations and qualified facilitators where appropriate (e.g., teen support groups); etc.

Education and training opportunities for adoptive parents – Education and training related to adoption issues, with an emphasis on strategies for handling loss, grief, relationship building, and "acting out" behaviors; skill-building to equip adoptive parents with the skills needed to meet the specific and developing needs of children (e.g., fetal alcohol, substance abuse, autism, etc.); providing adoption resource centers, lending libraries, newsletters, annual adoption conferences, and ongoing training and workshops for parents; etc.

Adoption competent education and mental health assistance services for adoptive families – Those providing education and therapeutic services have the basic knowledge and skills to effectively work with adoptive families and to empower adoptive parents and families to provide the environment necessary for ameliorating the effects of trauma (e.g., build relationships, improve relationships, develop nurturing and attachment, etc.); campaigns to recruit professionals to seek adoption competency; etc.

Case management services for adoptive parents and children – An intake process for families to return for needed services; designated case manager to respond to adopted children and families post-legal finalization; system to notify families of continued training, adoption workshops, and support group meetings, and resource guide that includes adoption-support information and service providers; etc.

Part 4 – Plans of Action for the Support of Adoptive Families

Three strategies and nine objectives comprise the plans of action for the support of adoptive families.

Support of Adoptive Families Strategy 1: Strengthen Florida Service Systems to Better Support Adoptive Families to Meet the Needs of Their Adopted Children and Youth. By 30 June 2015, the State of Florida will have implemented post adoption services that provide for mental health, emotional, physical and other needs of adoptive families.

Support of Adoptive Families Strategy 1 Objectives:

1.1 Information and Support for Adoptive Families. By 30 June 2015, the State of Florida will have implemented fully the state adopted Customer Service Protocol for supporting families with adopted children.

[Leads: Department of Children and Families and Community Based Care Lead Agencies]

1.2 Adoption Competent Professionals. By 30 June 2015, the State of Florida will have increased the number and accessibility of adoption competent mental health, education, and child welfare professionals, so that sufficient numbers are accessible as defined by each circuit.

[Leads: Department of Children and Families and Community Based Care Lead Agencies]

1.3 Post Adoption Services Counselors. By 30 June 2015, the State of Florida will have increased the number of post adoption services counselors in Florida so that each Community Based Care Lead Agency has a sufficient number (a minimum of one full-time staff person) dedicated to responding to the needs and inquiries of adoptive families after finalization. [Leads: Department of Children and Families and Community Based Care Lead Agencies]

Please Note: Adoption Services Counselors are staff persons designated to respond to the request and service needs of adoptive parents. The response to requests and service needs shall include, at a minimum, information and referrals, temporary case management, assistance with subsidy and Medicaid issues, and assistance in establishing and maintaining one or more adoptive parent support groups.

Support of Adoptive Families Strategy 2: Provide Information and Supports to Adoptive Families. By 30 June 2015, the State of Florida will have provided information and supports to Florida adoptive families on ways to build competence in meeting the needs of their adopted children and youth.

Support of Adoptive Families Strategy 2 Objectives:

2.1 Adoption Support Groups. By 30 June 2015, the State of Florida will have increased the number and sustainability of quality adoptive parent and youth support groups so that each community has a local support group or, in rural communities, at least a quarterly newsletter or warm-line that informs adoptive parents of nearby support groups and upcoming educational opportunities and information related to the *Five Protective Factors*. [Leads: Department of Children and Families and Community Based Care Lead Agencies]

- 2.2 Education Opportunities for Adoptive Parents. By 30 June 2015, the State of Florida will have increased the number and accessibility of quality educational opportunities for adoptive parents that include education related to the *Five Protective Factors*, caring for the needs of adoptive children, and supporting the needs of adoptive families. [Lead: Department of Children and Families and Community Base Care Lead Agencies]
- 2.3 Faith-Based and Community-Based Efforts. By 30 June 2015, the State of Florida will have provided information and resources to promote and build efforts by faith-based and community-based systems to provide family and community supports that would build the *Five Protective Factors* in Florida's adoptive families. [Lead: Executive Office of the Governor]

Support of Adoptive Families Strategy 3: Monitor and Evaluate Plan Implementation. By 30 June 2015, leadership of plan implementation will have monitored and annually assessed the progress and effectiveness the plan-based initiatives.

Support of Adoptive Families Strategy 3 Objectives:

- **3.1 Instrumentation and Procedures Design.** By 30 March 2011, the State of Florida will have created procedures and instrumentation for use by the plan workgroups for monitoring and annually reviewing progress. [Lead: Executive Office of the Governor]
- **3.2 Progress Monitoring.** By 30 June 2015, the State of Florida will have implemented an ongoing monitoring of plan implementation progress and used the findings to refine the action plans for future implementation. [Lead: Executive Office of the Governor]
- **3.3 Annual Review and Assessment.** By 30 June 2015, the State of Florida will have implemented annual progress reviews and used the findings to refine the strategies and objectives for future implementation. [Lead: Executive Office of the Governor]

Crosswalks of the Five Protective Factors and Continuum of Programs and Services

As stated previously, the *Five Protective Factors* reduce the incidence of child abuse and neglect by providing parents with what they need in order to parent effectively, even under stress. This plan was intentional with creating strategies and objectives that were either low cost or no cost and could easily implement the *Five Protective Factors* to ensure that Florida's children are placed in safe, stable, and nurturing homes. As shown below, each strategy and objective supports at least two of the *Five Protective Factors*, with four objectives implementing all five. The **Support of Adoption Families Strategy 3:** Monitor and Evaluate Plan Implementation and objectives are not included in the crosswalk because the objectives support implementation of all of the strategies and objectives in the five-year plan. One could conclude that all levels are impacted because of the support role of this objective, or one could conclude that none of the levels should be checked because it provides only a supporting role in the effort.

Table 5. Crosswalk of Support of Adoptive Families Strategies and Objectives with the Five Protective Factors

Programs and services that support adoptive families can be illustrated as a continuum with six categories. This plan was intentional in ensuring that each category of the continuum of programs and services would be represented within the support of adoptive families strategies and objectives. As shown below, each program and service on the continuum is addressed by at least one objective. Two objectives address four of the categories. The **Support of Adoption Families Strategy 3:** Monitor and Evaluate Plan Implementation and its three objectives are not included in the crosswalk because the objectives support implementation of all of the strategies and objectives in the five-year plan. One could conclude that all levels are impacted because of the support role of this objective, or one could conclude that none of the levels should be checked because it provides only a supporting role in the effort.

Plans of Action for Support of Adoptive Families Strategy 1: Strengthen Florida Service Systems to Better Support Adoptive Families to Meet the Needs of Their Adopted Children and Youth.

Support of Adoptive Families Strategy 1: Strengthen Florida Service Systems to Better Support Adoptive Families to Meet the Needs of Their Adopted Children and Youth. By 30 June 2015, the State of Florida will have implemented post adoption services that provide for mental health, emotional, physical and other needs of adoptive families.

Support of Adoptive Families Strategy 1 Objectives:

- 1.1 Information and Support for Adoptive Families. By 30 June 2015, the State of Florida will have implemented fully the state adopted Customer Service Protocol for supporting families with adopted children.
 [Leads: Department of Children and Families and Community Based Care Lead Agencies]
 1.2 Adoption Competent Professionals. By 30 June 2015, the State of Florida will have
 - **1.2** Adoption Competent Professionals. By 30 June 2015, the State of Florida will have increased the number and accessibility of adoption competent mental health, education, and child welfare professionals, so that sufficient numbers are accessible as defined by each circuit.

[Leads: Department of Children and Families and Community Based Care Lead Agencies]

1.3 Post Adoption Services Counselors. By 30 June 2015, the State of Florida will have increased the number of post adoption services counselors in Florida so that each Community Based Care Lead Agency has a sufficient number (a minimum of one full-time staff person) dedicated to responding to the needs and inquiries of adoptive families after finalization.

[Leads: Department of Children and Families and Community Based Care Lead Agencies]

Please Note: Adoption Services Counselors are staff persons designated to respond to the request and service needs of adoptive parents. The response to requests and service needs shall include, at a minimum, information and referrals, temporary case management, assistance with subsidy and Medicaid issues, and assistance in establishing and maintaining one or more adoptive parent support groups.

Support of Adoptive Families Objective 1.1: Information and Support for Adoptive Families

1.1. Information and Support for Adoptive Families. By 30 June 2015, the State of Florida will have implemented fully the state adopted Customer Service Protocol for supporting families with adopted children.

[Leads: Department of Children and Families and Community Based Care Lead Agencies]

Types of Support of Adoptive Families Approaches:

- Adoptive Parent and Youth Support Groups
- ☑ Education and Training Opportunities for Adoptive Parents
- ☑ Adoption Competent Education and Mental Health Assistance Services for Adoptive Families
- □ Case Management Services for Adoptive Parents and Children

Socio-Ecological Model Level(s) Influenced by this Objective:

- Societal LevelCommunity Level
- ✓ Relationship Level
 ✓ Individual Level

Protective Factors to be built by the Objective:

- ☑ Nurturing and Attachment
- ☑ Knowledge of Parenting and of Child and Youth Development
- ☑ Parental Resilience
- ☑ Social Connections
- ☑ Concrete Supports for Parents

Please Note: The plan of action for this objective mirrors that of the **Promotion of Adoption Objective 2.3** and **Support of Adoptive Families Objective 1.1**. The implementation of this plan of action is designed to accomplish both objectives in concert with one another.

Support of Adoptive Families Objective 1.1: Information and Support for Adoptive Families. By 30 June 2015, the State of Florida will have implemented fully the state adopted Customer Service Protocol for								
supporting families with adopted children.								
Action Steps	Measures/Benchmarks	Lead(s)	Potential Partner Organizations	Begin Date	End Date			
1.1.1 Incorporate the state adopted Customer Service Protocol into the contracts with Community Based Care Lead Agencies.	 1.1.1.1 By 30 July 2010, the Department of Children and Families will have negotiated use of the Customer Service Protocol in contracts with 100 percent of Community Based Care Lead Agencies. 1.1.1.2 By 30 June 2012, and annually thereafter, 100 percent of Community Based Care Lead Agencies will have incorporated the entire state adopted Customer Service Protocol into their contracts. By 30 June 2015, the State of Florida will have increased the number of post adoption services counselors in Florida so that each Community Based Care Lead Agency has a sufficient number (a minimum of one full-time staff person) dedicated to responding to the needs and inquiries of adoptive families after finalization.

Note: Adoption Services Counselors are staff persons designated to respond to the request and service needs of adoptive parents. The response to requests and service needs shall include, at a minimum, information and referrals, temporary case management, assistance with subsidy and Medicaid issues, and assistance in establishing and maintaining one or more adoptive parent support groups.

Support of Adoptive Families Strategy 2: Provide Information and Supports to Adoptive Families. By 30 June 2015, the State of Florida will have provided information and supports to Florida adoptive families on ways to build competence in meeting the needs of their adopted children and youth.

Support of Adoptive Families Strategy 2 Objectives:

- 2.1 Adoption Support Groups. By 30 June 2015, the State of Florida will have increased the number and sustainability of quality adoptive parent and youth support groups so that each community has a local support group or, in rural communities, at least a quarterly newsletter or warm-line that informs adoptive parents of nearby support groups and upcoming educational opportunities and information related to the *Five Protective Factors*. [Leads: Department of Children and Families and Community Based Care Lead Agencies]
- 2.2 Education Opportunities for Adoptive Parents. By 30 June 2015, the State of Florida will have increased the number and accessibility of quality educational opportunities for adoptive parents that include education related to the *Five Protective Factors*, caring for the needs of adoptive children, and supporting the needs of adoptive families.
 [Lead: Department of Children and Families and Community Based Care

Lead Agencies]

2.3 Faith-Based and Community-Based Efforts. By 30 June 2015, the State of Florida will have provided information and resources to promote and build efforts by faith-based and community-based systems to provide family and community supports that would build the *Five Protective Factors* in Florida's adoptive families.

[Lead: Executive Office of the Governor]

Support of Adoptive Families Objective 2.1: Adoption Support Groups

2.1. Adoption Support Groups. By 30 June 2015, the State of Florida will have increased the number and sustainability of quality adoptive parent and youth support groups so that each community has a local support group or, in rural communities, at least a quarterly newsletter or warm-line that informs adoptive parents of nearby support groups and upcoming educational opportunities and information related to the *Five Protective Factors*.

[Leads: Department of Children and Families and Community Based Care Lead Agencies]

Types of Support of Adoptive Families Approaches:

- ☑ Adoptive Parent and Youth Support Groups
- ☑ Education and Training Opportunities for Adoptive Parents
- □ Adoption Competent Education and Mental Health Assistance Services for Adoptive Families
- □ Case Management Services for Adoptive Parents and Children

Socio-Ecological Model Level(s) Influenced by this Objective:

- $\square Societal Level \qquad \qquad {\begin{tabular}{ll} \hline \blacksquare Relationship Level \end{tabular}} \label{eq:societal}$
- $\Box \text{ Community Level } \qquad \blacksquare \text{ Individual Level}$

Protective Factors to be built by the Objective:

- ☑ Nurturing and Attachment
- \blacksquare Knowledge of Parenting and of Child and Youth Development
- ☑ Parental Resilience
- \blacksquare Social Connections
- ☑ Concrete Supports for Parents

Plan of Action for Adoption Support Groups

Support of Adoptive Families Objective 2.1: Adoption Support Groups. By 30 June 2015, the State of Florida will have increased the number and sustainability of adoptive parent and youth support groups so that each community has a local support group or, in rural communities, at least a quarterly newsletter or warm-line that informs adoptive parents of nearby support groups and upcoming educational opportunities and information related to the *Five Protective Factors*.

Support of Adoptive Families Objective 2.3: Faith-Based and Community-Based Efforts

2.3. Faith-Based and Community-Based Efforts. By 30 June 2015, the State of Florida will have provided information and resources to promote and build efforts by faith-based and community-based systems to provide family and community supports that would build the *Five Protective Factors* in Florida's adoptive families.

[Lead: Executive Office of the Governor]

Types of Support of Adoptive Families Approaches:

- Adoptive Parent and Youth Support Groups
- ☑ Education and Training Opportunities for Adoptive Parents
- □ Adoption Competent Education and Mental Health Assistance Services for Adoptive Families
- □ Case Management Services for Adoptive Parents and Children

Socio-Ecological Model Level(s) Influenced by this Objective:

□ Societal Level	☑ Relationship Level
Community Level	✓ Individual Level

Protective Factors to be built by the Objective:

- ☑ Nurturing and Attachment
- ☑ Knowledge of Parenting and of Child and Youth Development
- ☑ Parental Resilience
- \blacksquare Social Connections
- \square Concrete Supports for Parents

Tactics:

- **2.3.1** Tool Kit Enhancements. By 30 June 2015, the State of Florida will have provided ongoing guidance, technical assistance, access to materials and user-friendly communications strategies as needed to each circuit in order to initiate and continue the engagement of faith-based and community-based systems in the prevention of child abuse using the *Five Protective Factors* (See Prevention Objective 1.6), promotion of public adoption (See Promotion of Adoption Objective 2.1), and support of adoptive families (see Support of Adoptive Families Objective 2.3).
- **2.3.2** Best Practices. By 30 June 2015, the State of Florida will have created and implemented a review team to continue to research and report on best and promising practices state and nationwide to help circuits with their initiatives.
- **2.3.3 Leadership Summits.** By 30 June 2015, the State of Florida will have held annual Faith Based Leader Summits to engage faith and community leaders and update them on evidence-informed prevention and permanency practices and provide tools and resources to local faith and community leaders to engage local faith-based and community-based systems in prevention and permanency roundtable discussion meetings at the local level.

Please Note: The plan of action for this objective mirrors that of the **Prevention Objective 1.6**, **Promotion of Adoption Objective 2.1**, and **Support of Adoptive Families Objective 2.3**. The

implementation of this plan of action is designed to accomplish all three objectives in concert with one another.

Plan of Action for Faith-Based and Community-Based Efforts, Leadership Summits

Support of Adoptive Families Objective 2.3, Tactic 2.3.3: Faith-Based and Community-Based Efforts, Leadership Summits.

By 30 June 2015, the State of Florida will have held annual Faith Based Leader Summits to engage faith and community leaders and update them on evidence-informed prevention and permanency practices and provide tools and resources to local faith and community leaders to engage local faith-based and community-based systems in prevention and permanency roundtable discussion meetings at the local level.

Action Steps	Measures/ Benchmarks	Lead	PartnersBegin DateEnd Date
2.3.3.1 Create an ongoing Faith Based Summit Committee to plan statewide summits and provide support in the engagement of faith and community leaders with local congregations in local roundtables.	2.3.3.1 By 30 September 2010, the Faith Based Summit Committee will have been created. Plans of Action for Support of Adoptive Families Strategy 3: Monitor and Evaluate Plan Implementation

Support of Adoptive Families Strategy 3: Monitor and Evaluate Plan Implementation. By 30 June 2015, leadership of plan implementation will have monitored and annually assessed the progress and effectiveness the plan-based initiatives.

Support of Adoptive Families Strategy 3 Objectives:

- **3.1 Instrumentation and Procedures Design.** By 30 March 2011, the State of Florida will have created procedures and instrumentation for use by the plan workgroups for monitoring and annually reviewing progress. [Lead: Executive Office of the Governor]
- **3.2 Progress Monitoring.** By 30 June 2015, the State of Florida will have implemented an ongoing monitoring of plan implementation progress and used the findings to refine the action plans for future implementation. [Lead: Executive Office of the Governor]
- **3.3** Annual Review and Assessment. By 30 June 2015, the State of Florida will have implemented annual progress reviews and used the findings to refine the strategies and objectives for future implementation. [Lead: Executive Office of the Governor]

Support of Adoptive Families Objective 3.1: Instrumentation and Procedures Design

3.1. Instrumentation and Procedures Design. By 30 March 2011, the State of Florida will have created procedures and instrumentation for use by the plan workgroups for monitoring and annually reviewing progress.

[Lead: Executive Office of the Governor]

Because this is an objective that supports implementation of all of the strategies and objectives in the five-year plan, the standard format for identifying the areas of the continuum, the levels of the socio-ecological model and the protective factors addressed is not included. One could conclude that all levels are impacted because of the support role of this objective, or one could conclude that none of the levels should be checked because it provides only a supporting role in the effort.

It is elected that the efforts taken to accomplish each plan objective will be monitored and assessed annually in order to address both implementation and effectiveness. This will entail two levels of oversight and study. One is the **monitoring** of the ongoing progress of the implementation of the plan. It is important that all of the planning and implementing partners be actively involved on a regular basis to discuss their efforts and determine how, collectively, they are taking action as a continuous process. This will provide opportunities to determine and celebrate the producing of measurable improvement in the well-being of Florida's communities and in the performance of the actions contributing to these results. The second is the **annual review of progress** with a focus on the summary accomplishments of the process as well as what results or changes have been noted as a result of the work each year. See Appendix G for an example of an annual review.

During the first year of plan implementation, the lead partners for each objective (CAPP Plan Leaders) will be involved in designing the final monitoring tool to be used. Skilled evaluators in private practice and affiliated with Florida universities will be tapped to provide assistance with this effort. Instrumentation and procedures will be developed that will lend themselves to serving as a management tool for the leadership and partners for each of the plan objectives. Below is the plan of action for the development of the monitoring and evaluation instrumentation and procedures.

3.1.11 Distribute the instruments and procedures to the CAPP Plan Leaders.						

Support of Adoptive Families Objective 3.2: Progress Monitoring

3.2. Progress Monitoring. By 30 June 2015, the State of Florida will have implemented an ongoing monitoring of plan implementation progress and used the findings to refine the action plans for future implementation.

[Lead: Executive Office of the Governor]

Because this is an objective that supports implementation of all of the strategies and objectives in the five-year plan, the standard format for identifying the areas of the continuum, the levels of the socio-ecological model and the protective factors addressed is not included. One could conclude that all levels are impacted because of the support role of this objective, or one could conclude that none of the levels should be checked because it provides only a supporting role in the effort.

While the monitoring and evaluation instrumentation and procedures are being developed, a statewide learning community will be formed. The participants will serve as the key informants throughout the plan implementation period. Leadership and other partners for each plan objective will be invited to serve as active members of the statewide support of adoptive families learning community. There will be at least one representative from each plan objective. They will serve as the leads for conducting performance reviews at the objective level and for informing and advising the learning community at the state level. At this time we will call them CAPP Plan Leaders. However, these leaders could appoint designees to stand in their stead.

Objective Level

A lead will be identified for each of the six (6) objectives for the first two (2) Support of Adoptive Families plan strategies. Each CAPP Plan Leader will assume the responsibility for convening the workgroup partners for the initiative on a regularly scheduled basis. The purpose of these meetings (either in person or via conference call) will be to prepare a performance report that covers such areas as:

- The customers or recipients reached or served by the initiative during the period.
- How well have we implemented the action plan? What has worked well? What has not? What should we do about it? [This is not a blow by blow of everything the workgroup has done, but a more strategic look at whether or not what needed to happen did happen; why or why not.]
- How successful have we been in engaging our partners? Is anyone missing and if so, what should we do about it?
- What do we need to do in this next period to continue our stellar performance or make it even better? What will we do and who will do it?

The final reporting areas will be addressed and defined by the work on **Support of Adoptive Families Objective 3.1**. These reports will be used to plan mid-course adjustments in order to maintain stellar implementation or improve performance as appropriate. They will also be used as the basis for the conversation with the statewide learning community.

State Level

This learning community will be involved in regularly scheduled conference calls. These will be held at least quarterly and more often if the community decides to do so. During the calls, participants will be asked to:

- Report on the status of implementation for each objective.
- Share successes.
- Share barriers to implementation and solutions generated if applicable.
- Brainstorm new or possible solutions.

The final discussion areas will be addressed and defined by the work on **Support of Adoptive Families Objective 3.1** Instrumentation and Procedures Design. These state level reports will be used to assist with planning for mid-course adjustments in order to maintain stellar implementation or improve performance as appropriate.

Additionally, spokespersons for the learning community will be identified. Reports will be prepared based upon the state level meetings. These reports will be presented and discussed with the Child Abuse Prevention and Permanency Advisory Council as a standing agenda item at the Advisory Council meetings during the five-year period.

Support of Adoptive Families Objective 3.2: Progress Monitoring By 30 June 2015, the State of Florida

Plan of Action for Progress Monitoring

Support of Adoptive Families Objective 3.3: Annual Review and Assessment

3.3. Annual Review and Assessment. By 30 June 2015, the State of Florida will have implemented annual progress reviews and used the findings to refine the strategies and objectives for future implementation.

[Lead: Executive Office of the Governor]

Because this is an objective that supports implementation of all of the strategies and objectives in the five-year plan, the standard format for identifying the areas of the continuum, the levels of the socio-ecological model and the protective factors addressed is not included. One could conclude that all levels are impacted because of the support role of this objective, or one could conclude that none of the levels should be checked because it provides only a supporting role in the effort.

The annual reporting procedures will be developed as a result of implementation of **Support of Adoptive Families Objective 3.1** Instrumentation and Procedures Design. Once this is completed, it will be shared with each of the CAPP Plan Leaders during a statewide learning community meeting. At least annually, the instrument will be completed for each objective by the CAPP Plan Leader and discussed at the statewide learning community meeting. The individual reports and the results of the discussion will be codified into an annual report that will be delivered to the Executive Office of the Governor and to the Governor's Child Abuse Prevention and Permanency Advisory Council. This information will also be provided to a workgroup that will conduct a "turn the curve" exercise to monitor and discuss population level changes and future direction. The product of these exercises will be made available to the Children and Youth Cabinet of Florida.

Part 5 - Overview of the Circuit Plans for the Support of Adoptive Families

Summary of Local Plans – Support of Adoptive Families

The following summaries and tables are based on the Circuit Support of Adoptive Families Plans: July 2010 – June 2015. This section provides summaries of the plans':

- Local priority needs
- Planned objectives and strategies
- Barriers to plan implementation
- Recommendations for changes in policy and legislation.

Local Plan Strategies and Objectives by Circuit and County

Circuit	Counties	Strategy		Objective
1	Escambia Santa Rosa Okaloosa Walton	Strategy 1 By 30 June 2015, Circuit 1 will have at least five adoption competent mental health therapist in Escambia and Okaloosa Counties and at least two in Santa Rosa and Walton Counties.	Objective 1.1	The adoption competent trainers will train in each of the four counties community mental health centers and at minimum of five therapists in each county will be certified by June 30, 2015.
1	Escambia Santa Rosa Okaloosa Walton	Strategy 2 By June 30, 2015 Adoptive respite services will be available throughout the Circuit.	Objective	Develop county-level strategies to engage local churches and community organizations in Circuit 1 to help support adoptive families through respite and adoption support information programs.
2	Leon Gadsden Wakulla	Strategy 1 By 30 June 2015, Circuit 2 adoptive families will have the enhanced	Objective 1.1 Objective 1.2	Facilitate the coordination of support activities. Increase adoptive parent resources and distribution
	Jefferson Franklin Liberty	capacity to provide a safe, stable, nurturing environment for children who have obtained permanency through adoption.	Objective 1.3	of information. Increase training and educational opportunities for adoptive families.
			Objective 1.4	Explore establishing adoptive parent and teen support groups.
			Objective 1.5	Plan for the provision of in-home behavioral and therapeutic services.
	~		Objective 1.6	Establish a network of adoption competent providers, professionals, and parents.
3	Columbia Dixie Lafayette Hamilton Madison Suwannee Taylor	Strategy 1 By 30 June 2015, Circuit 3 will support successful adoptions with improved help from adoption competent counselors and group supports. (Note: CHS will administer a survey to adoptive families to assess their needs and will base the type of services provided on the results of the needs assessment. It is also important to note that CHS has found that many adoptive families are not interested in services and they just want to resume a normal family life after the adoption is finalized)	Objective 1.1	Maintain trained workforce and Increase number of professionals trained by Rutgers program for Adoption Competency Certification Training.
4	Clay ONLY	Strategy 1 By 30 June 2015; Circuit 4 Clay Co. will have enhanced parental supports for adoptive families incorporating the five protective factors.	Objective 1	By 30 June, 2015, respite care will be available for all adoptive parents when needed.
4	Clay ONLY	Strategy 2 By 30 June 2015; Circuit 4 Clay Co. will have increased knowledge and use of the five protective factors in support for adoptive families.	Objective 2.1	By 30 June 2015; Circuit 4 Clay Co. will have incorporated the five protective factors into a support group for adoptive families.
4	Duval ONLY	Strategy 1.2 By 30 June 2015; Circuit 4 – DUVAL CO. will have increased the number of adoption competent child welfare workers to address the special needs of	Objective 1.2.1	By June 2015, Circuit 4 – DUVAL CO. will have increased the number of adoption competent child welfare workers providing services to adoptive families.
		adoptive families.	Objective 1.2.2	By June 2015, Circuit 4 – DUVAL CO. will have expanded pre-adoption education to include the five protective factors for prospective adoptive parents and their families.

Circuit	Counties	Strategy		Objective
11	Miami-Dade	Strategy 5 By 30 June 2015, Circuit 11 will provide post adoption case management services.	Objective 5	Provide post-adoption case management services for adoptive parents and children.
11	Miami-Dade	Strategy 6 By 30 June 2015, Circuit 11 will have developed and distributed an adoptive parent handbook to all current and prospective adoptive parents.	Objective 6	Develop and provide an adoptive parent handbook.
11	Miami-Dade	Strategy 7 By 30 June 2015, Circuit 11 will have operational an evening and weekend hotline to specifically meet the needs of adoptive parents in Miami-Dade County.	Objective 7	Develop an evening and weekend hotline for adoptive parents.
12	Manatee Sarasota DeSoto	Strategy 1 By 30 June 2015, Circuit 12 will expand the number of providers that are trained in the Adoption Competency model and expand the training opportunities available to adoptive parents.	Objective 1.1 Objective 1.2	Train and implement the Adoption Competency model in an effort in increase the number of providers trained and able to work with adoptive families in this model. Expand the training opportunities for adoptive parents through partnering with the Foster Parent Associations, making PAIRS training more accessible, and increasing the number of adoptive parents attending DCF/CBC adoption focused
12	Manatee Sarasota DeSoto	Strategy 2 By 30 June 2015, Circuit 12 will develop a committee, to include formal and informal participants, who will focus on issues affecting adoptive families and identifying needs/solutions to gaps in services.	Objective 2.1	conferences. Establish a committee that will include formal and informal participants that will focus on issues affecting adoptive families and identify needs/solutions to gaps in services.
13	Hillsborough	Strategy 1 By 30 June 2015, Circuit 13 will develop and implement a web based information site for adoptive families.	Objective 1.1 Objective 1.2	Develop a comprehensive survey tool to determine the baseline of available services in Hillsborough County. Develop a comprehensive survey tool for post adoptive families to identify needs and future potential needs.
			Objective 1.3	Establish a maintenance plan to ensure consistent and accurate information is posted.
			Objective 1.4	Design and launch a website devoted to resources and information for Hillsborough County families.
			Objective 1.5	Create a multimedia marketing and plan to ensure information is available through various media. (Print, video, displays in public places, etc.)
13	Hillsborough	Strategy 2 By 30 June 2015, Circuit 13 will increase the number of Adoption Competent Services (including mental health, behavioral, paraprofessional and case management) available to	Objective 2.1 Objective 2.2	Identify service providers that accept Medicaid or who are willing to become Medicaid eligible and are willing to participate in the adoption competency certification process.
		families.		St. Petersburg College to merge Adoption Competency Certifications.
			Objective 2.3	Provide Adoption Competency Training tracks in multiple areas around the county.
13	Hillsborough	Strategy 3 By 30 June 2015, Circuit 13 will implement a Faith Based support network for Adoptive Families.	Objective 3.1	Partner with five faith-based and community-based systems to develop and implement strategies and programs that provide organized support to adoptive families in Hillsborough County by 2015.

Circuit	Counties	Strategy		Objective
14	Bay Calhoun Gulf	Strategy 1 By 30 June 2015, Circuit 14 adoptive families will have the enhanced	Objective 1.1	Training/Education opportunities for Adoptive Parents.
	Holmes Jackson Washington	capacity to provide a safe, stable, nurturing environment for children who have obtained permanency through Adoption.	Objective 1.2	Circuit 14 will participate in the training of mental health professionals in the Adoption Competent Mental Health Certification process.
			Objective 1.3	Adoptive Parent and Teen Support Groups will be established.
15	Palm Beach	Strategy 1 By 30 June 2015, Circuit 15 will have a formalized adoption support system.	Objective 1.1	Update the adoption services handbook to include details on all available support options in the circuit.
			Objective 1.2	Develop a central tracking system for adoption support activities.
			Objective 1.3	Ensure information is distributed at key points during the adoptive process.
15	Palm Beach	Strategy 2 By 30 June 2015, Circuit 15 will have certified adoption competent providers.	Objective 2.1	By June 30, 2011, there will be 12 adoption competent providers in the circuit.
15	Palm Beach	Strategy 3 By 30 June 2015, Circuit 15 will have implemented a trauma informed system of care.	Objective 3.1	By June 30, 2011, all staff working with dependent children will be completely trained in Trauma Informed Care.
16	Monroe (Seven labeled strategies were taken directly from Circuit 11's plan)	Miami-Dade County, Circuit 11, providing support to Monroe County Circuit 16 Strategy 1 Currently there are no adoption competent therapists that provide services under Medicaid, to meet the needs of the Miami Dade adoption community. By 30 June 2015, Circuit 11 will have an adequate number of adoption competent therapists that are covered by Medicaid, to meet the needs of the Miami-Dade adoption community.	Objective 1	Insure adequate participation from the Miami- Dade therapeutic community to develop this expertise for our adoptive families.
16	Monroe	Miami-Dade County, Circuit 11, providing support to Monroe County Circuit 16 Strategy 2 By 30 June 2015, Circuit 11 will have an adequate number of adoption support groups throughout the community to meet the needs of adoptive parents and children.	Objective 2	Increase availability of adoption support groups for parents and youth.
16	Monroe	Miami-Dade County, Circuit 11, providing support to Monroe County Circuit 16 Strategy 3 By 30 June 2015, Circuit 11 will have a program of adoption training provided throughout our community to meet the needs of adoptive parents and their prospective children.	Objective 3	Provide adoption training for parents who have a child placed with them for adoption.
16	Monroe	Miami-Dade County, Circuit 11, providing support to Monroe County Circuit 16 <i>Strategy 4</i> By 30 June 2015, Circuit 11 will have a program of post-adoption training provided throughout our community to meet the needs of post-adoptive parents and their children.	Objective 4	Provide post-adoption training for parents who have a child placed with them for adoption.

Circuit	Counties	Strategy		Objective
16	Monroe	Miami-Dade County, Circuit 11, providing support to Monroe County Circuit 16 Strategy 5 By 30 June 2015, Circuit 11 will provide post adoption case management services.	Objective 5	Provide post-adoption case management services for adoptive parents and children.
16	Monroe	Miami-Dade County, Circuit 11, providing support to Monroe County Circuit 16 Strategy 6 By 30 June 2015, Circuit 11 will have developed and distributed an adoptive parent handbook to all current and prospective adoptive parents.	Objective 6	Develop and provide an adoptive parent handbook.
16	Monroe	Miami-Dade County, Circuit 11, providing support to Monroe County Circuit 16 Strategy 7 By 30 June 2015, Circuit 11 will have operational an evening and weekend hotline to specifically meet the needs of adoptive parents in Miami-Dade County.	Objective 7	Develop an evening and weekend hotline for adoptive parents.
16	Monroe	Information not provided	Objective 1	Offer three month post placement supervision through WHFS Neighborhood Center that will include: • Counseling • Support • Aftercare services
16	Monroe	Information not provided	Objective 2.	Provide Support Groups for post adoption families:In all three WHFS locationsMentoring services
16	Monroe	Information not provided	Objective 3	 "Magic Wand" Provide wrap around services for adoption disruption prevention: Monthly support groups for adopted children More specific training for parenting classes Mentoring available by seasoned adoptive parents
17	Broward	Strategy 1 By 30 June 2015, Circuit 17 will increase awareness and accessibility to post adoptive supports and services.	Objective 1.1 Objective 1.2 Objective 1.3	Adoptive families in Broward County will be supported through post adoption services. Adoptive families will gain an increased awareness of all available services in the Circuit. Adoptive families will gain access and availability to adoption competent service providers and support services after finalization.
18	Brevard Seminole	Strategy 1 By 30 June 2015, Circuit 18 will have developed a pool of adoption competent mental health professionals.	Objective 1.1 Objective 1.2 Objective 1.3	Increase the number of adoption competent trainers. Train adoption competency to local mental health professionals. Develop a listing of adoption competent mental health professionals.
18	Brevard Seminole	Strategy 2 By 30 June 2015, Circuit 18 will explore the possibility of creating and maintaining adoption support groups for parents and teenagers.	Objective 2.1 Objective 2.2 Objective 2.3	Increase attendance and awareness of current adoption support groups. Explore funding options for creation of a Seminole County support group. Advertise & hire a facilitator position for a
			Objective 2.4	Seminole County support group. Identify meeting location and advertise the Seminole County support group.

Anticipated Barriers for Local Plan Implementation by Circuit and County

Table 9. Anticipated Barriers for Local Plan Implementation by Circuit and County

Circuit	Barriers to the Support of Adoptive Families in the Circuit
1 Escambia Santa Rosa Okaloosa Walton	• Funding restrictions may be a barrier to obtaining adoptive competent training opportunities for local mental health professionals and sources of funding for respite care payments.
2 Leon Gadsden Wakulla Jefferson Franklin Liberty	 Liability and legal issues exist which create difficulties in securing adequate locations at which to host adoptive parent support groups. Some children that become legally free for adoption ultimately do not wish to be adopted. There is a lack of adequate funds and resources to provide services after a case is closed. Generally, there is a lack of specialized and affordable services within the community to sustain the child(ren) with the adoptive parents, particularly in the outlying areas. Adopted children often require specialized mental health services. Once the adoption is finalized, many children are unable to receive those services due to gaps in what is covered under Medicaid.
3 Columbia Dixie Lafayette Hamilton Madison Suwannee Taylor	 Funding for staff and resources to accomplish goals. The large geographical area within which the resources are currently spread.
8 Alachua Baker Bradford Gilchrist Levy Union	
4 Duval Nassau Clay	 Limited funding for staff. Referrals have increased but not in proportion to staff available to address needs. Need more adoption competent post adoption staff to address family concerns. Limited pre-adoption counseling is being provided and lack of manpower is a barrier to providing this much need service. Lack of manpower is also a barrier for creating and facilitating gender specific teen groups which are very helpful.
5 Citrus Hernando Lake Marion	 In a rural area such as Circuit 5 it is difficult to balance access to services such as support groups. Providers desire to organize support groups in location and at times that are convenient for the intended audiences. Yet, the effective use of staff and resources require groups to also be in places with the potential to attract a minimum number of participants. Adoptive parents also need to have consistency in when these groups are offered so they can attend when their schedule allows.
Sumter	 Additionally, barriers identified in 2009- 2010 plan still remain. On-going need for additional financial resources and subsequent services. Geography and transportation to available services. Lack of behavioral health services that some children need. Medicaid does not pay for the required therapy and it is very expensive for families to afford. The economy may cause more stress on adoptive families requiring them to seek more support services. This situation has only increased since development of the current plan.
6 Pasco Pinellas	 Isolation of adoptive families in the community Lack of education in community partners regarding adoption issues Lack of state funding for adoptive special needs children for mental health treatment. Lack of respite for adoptive families

Circuit	Barriers to the Support of Adoptive Families in the Circuit
7 Flagler Putnam	 The medical/dental providers do not have an increase in payment for services through Medicaid. Thus, there are limited providers within the community who accept this form of insurance. Those who do accept Medicaid are overcapacity and must turn down new Medicaid clients.
St. Johns Volusia	 The attorneys utilized for this service charge the amount Department of Children and Families is allowed to reimburse totaling \$1000 for each child.
Volusiu	 Children who are diagnosed with a disability defined by the Agency for Persons with Disability (APD) after the adoption is final are placed on a waiting list for Med Waiver with other children. However, only those children currently in out-of-home care are given priority if APD opens enrollment prior to finalization.
	 The Adoption Support groups are only held in Volusia County. Need to expand locations to services all of Circuit 7. There is no affordable respite care designated for adopted children. Most adoptive parents are unable to pay the cost for group homes and/or residential treatment. The demand is high and has created a strain, both financially and number of beds available, to meet the needs of these children through the Substance Abuse and Mental Health (SAMH) office. Thus, children are being removed from the family by the request of the parents and placed back into the dependency system.
9 Orange Osceola	• Funding for post adoption support services, lack of funds for respite care.
10 Hardee Highlands Polk	• The quantity and accessibility of adoption competent mental health professionals in our circuit is limited.
11 Miami-Dade	 Adoption support groups – barriers include: Communication – no computerized e-mail, regular address or phone lists available for communicating with the adoptive families and privacy issues relating to releasing this information to community groups. Effective leadership – groups without effective leadership do not provide viable support to their members. System wide support for developing and maintaining adoption support groups. Adoption competent therapists – identifying professionals in the community who will participate in becoming certified. Also, how to pay for parent and other family participants. In the current economy, the \$75 – 150 needed for counseling in one of the first items cut from a family's budget. All proposed activities require some financial resources. A barrier may be the lack of available financial support,
12	 particularly if grantors cannot be found that are interested in assisting with the particular activity. Also, many of the people involved in these community efforts are not skilled in grant writing. Lack of adequate funds & resources to support adoptive families after adoption is finalized.
DeSoto	 Lack of adequate runds & resources to support adoptive ramines after adoption is manzed. Lack of community services to assist adoptive families.
Manatee Sarasota	• Lack of resources, including respite providers, reactive attachment providers, local mental health providers and residential treatment services.
	 Limited number of adoption competent mental health & educational professionals. Inadequate Medicaid coverage and provider network for dental & medical services.
	 Current economy adds stress to adoptive families & increases need for supports.
	 Medicaid reimbursement levels that limit provider participation. Children with diagnoses after adoption are placed on Medical Waiver waiting list, but only those children currently in out-of-home care are given priority if Agency with Persons with Disabilities opens enrollment.
	 Lack of awareness of full range of available supports & services. Limited funding for post-adoption services, especially for those adopting through private & international sources. Contact with service providers at point of crisis rather than earlier.
	Adoptive family receptiveness to support services.
13 Hillsborough	 A barrier in providing comprehensive post adoption support is the lack of adequate tracking regarding disruptions and dissolutions. Although the number of dissolutions was provided, as was the stated cause, more detailed information is needed to understand the issues surrounding a failed adoption. Our plan addresses this somewhat in that we will design and implement a survey to be distributed to families receiving a Maintenance Adoption Subsidy every year. However, surveys are only effective as they are returned. Requiring the courts to submit data when an adoption is dissolved would garner the information needed.
14 Bay Calhoun Gulf Holmes	• It is important for this plan to serve as a Circuit 14 community plan and be acknowledged and respected as such. The efforts identified, strategies put in place to achieve the efforts, and needs identified are those of the individuals with a vested interest in the local community. Members of the planning team and those taking active leads know the needs of Circuit 14 and their continued involvement and ideas to achieve the efforts must be supported by leadership outside of Circuit 14.
Jackson Washington	 As with nost plans and/or projects momentum comes and goes at periodic times during the process. It is of utmost importance that the efforts identified and actions to be taken are closely monitored to ensure continued progress by all involved. Losing momentum could mean jeopardizing or delaying much needed efforts in Circuit 14. The Department, through partnership with community providers and active circuit planning team members must commit to the sustainability of this plan to achieve best outcomes for the Circuit 14 community. Based on the current relationship within the Circuit 14 community and those committed to this plan this goal is achievable.

Circuit	Barriers to the Support of Adoptive Families in the Circuit
15 Palm Beach	• There are no anticipated barriers to the goal of developing a comprehensive adoption support system in the circuit. There are already several providers of these services, albeit, informal in nature. Child and Family Connections only began subcontracting for specific services this fiscal year. The only potential barrier lies in filling any identified
	service gaps. Since these services are largely informal and not funded though state child welfare dollars, we may be limited in our ability to diversify services and fill gaps.
	• Certification in adoption competency and trauma informed care are only limited by the potential for other training or operational priorities that mental health providers and case management staff may need to respond to.
16	• Adoption support groups – barriers include:
Monroe	Communication – no computerized e-mail, regular address or phone lists available for communicating with
	the adoptive families and privacy issues relating to releasing this information to community groups.
	• Effective leadership – groups without effective leadership do not provide viable support to their members.
	• System wide support for developing and maintaining adoption support groups.
	 Adoption competent therapists – identifying professionals in the community who will participate in becoming certified. Also, how to pay for parent and other family participants. In the current economy, the \$75 – 150 needed for counseling in one of the first items cut from a family's budget.
	 All proposed activities require some financial resources. A barrier may be the lack of available financial support,
	particularly if grantors cannot be found that are interested in assisting with the particular activity. Also, many of the
	people involved in these community efforts are not skilled in grant writing.
17	• We currently rely on FSFN for our reporting and data capture, however FSFN is not designed to measure all areas
Broward	of interest, such as families who respond to recruitment efforts, the types of efforts that yield the most valuable responses, and any cost benefit analysis. Circuit 17 does not have any such database either.
18	• Barriers related to supporting adoptive families: For adoptive families who need support that reside outside the
Brevard	county in which they adopted, a barrier can be linkages to adequate supports and services. A statewide directory of
Seminole	such adoption specific and adoption competent resources could assist in the integration of statewide resources.
	 Adoptive families may fear retaliation or feel stigmatized by accessing resources from the agency in which they
19	 adopted the child. Supports are limited and adoptive parent's understanding of needs for support (until a crisis occurs) appears limited
Indian River Martin	• Supports are limited and adoptive parent's understanding of needs for support (until a crisis occurs) appears limited as well. The challenge we face is developing supports, and recognition of the need for the supports, simultaneously.
St. Lucie	
Okeechobee	
20	• Funding needed for the purchase of supportive services, specifically for the expansion of mental health, including
Charlotte	residential care, and orthodontic care.
Collier	• Funding needed for the purchase of educational services, which are above and beyond the requirements of the
Glades	school board, but necessary for the children who are being adopted, to include tutorial services.
Hendry Lee	• Funding needed for the purchase of supportive services for the adoptive parents, specifically relationship and family counseling.
	• Funding for a paid Volunteer Coordinator position to maintain adoption support groups.
	• Documentation of the need: Surveys and subsidy questionnaires have been received from adoptive families, which
	document their needs.

Local Planning Team Recommendations for State Level and Legislative Action

Table 10. Local Planning Team Recommendations for State Level and Legislative Action

Circuit	State Level and/or Legislative Action Recommendations from the Circuits
1	College tuition waiver eligibility prior to May 5, 1997 finalization date.
Escambia	MAS through high school graduation regardless of age.
Santa Rosa	Medicaid eligibility through high school and college.
Okaloosa	
Walton	
2	Increase funding for post adoption services
Leon	Continue to fund Adoption Competency training at the State level for local providers
Gadsden	Increase the network of specialized providers who accept Medicaid
Wakulla	
Jefferson	
Franklin	
Liberty	
3	• Funds are needed for post adoption services, preventative and proactive services, vs. reactive when they are calling
Columbia	for help.
Dixie	Clearer Florida Administrative Code direction regarding the requirement of psychological evaluations for subsidy
Lafayette	(interpretation of the current code requirements varies based on location/circuits), specifically for children 3 and
Hamilton	under. For children too young to be adequately diagnosed by way of a psychological evaluation, requiring such as a
Madison	prerequisite to subsidy may be a source of unnecessary delay and ineffective use of resources. Additionally, a way to
Suwannee	review eligibility for children who may have delayed reactions to earlier childhood trauma (after finalization) would
Taylor	be helpful.
ø	
8 Alachua	
Baker	
Bradford	
Gilchrist	
Levy	
Union	
4	• Statues re: Pre-adoptive Case Plan should include Adoption 101 in addition to MAPP classes. This has been a
Duval	recommendation of several caseworkers. However there must be legislative and judicial support of this change
Nassau	before it will be embraced.
Clay	
5	• As noted, the adoption competent educational and mental health services in the service area that we currently do not
Citrus	have resources. We believe that state should assist in this service area by:
Hernando	Provide opportunities/training/incentives for therapist to become skilled in dealing with severe issues many of
Lake	the children face.
Marion	 Address Medicaid issues related to behavioral therapy.
Sumter	• Additionally, as noted in current plan, parents adopting children from the foster care system must be able to access
	subsidies for needs that may arise throughout the life of the child.
6	Legislative action that supports adoptive parents who need mental health treatment for their children
Pasco	• Funding increases
Pinellas	• Special Conditions as removal factor to enable an adoptive child to re-enter the foster care system when the
	community mental health system can no longer support the placement
7	• Recommend the Florida Administrative Code 65C-16 re-drafted to elaborate on the specific types of services to meet
Flagler	the requirements related to educational and mental health.
Putnam	• The medical/dental providers do not have an increase in payment for services through Medicaid. Thus, there are
St. Johns	limited providers within the community who accept this form of insurance. Those who do accept Medicaid are
Volusia	overcapacity and must turn down new Medicaid clients. Recommend the legislature increase Medicaid fees for
	medical and dental providers thus increasing the capacity for Medicaid eligible children.
	• Children who are diagnosed with a disability defined by the Agency for Persons with Disability (APD) after the
	adoption is final are placed on a waiting list for Med Waiver with other children. However, only those children
	currently in out-of-home care are given priority if APD opens enrollment. Recommend the legislature change the
	rules governing APD enrollment to give priority to post adopted children as well.
	• There is no affordable respite care designated for adopted children. Most adoptive parents are unable to pay the cost
	• There is no affordable respite care designated for adopted children. Most adoptive parents are unable to pay the cost
	for group homes and/or residential treatment. The demand is high and has created a strain, both financially and
	for group homes and/or residential treatment. The demand is high and has created a strain, both financially and
	for group homes and/or residential treatment. The demand is high and has created a strain, both financially and number of beds available, to meet the needs of these children through the Substance Abuse and Mental Health

Circuit	State Level and/or Legislative Action Recommendations from the Circuits
9 Orange Osceola	• An increase in non-recurring adoption expenses to help pay for travel for out of state or out of district families would help expand the number of families available to adopt. Current non-recurring adoption expenses are utilized primarily for legal fees. Increase the amount of time FDLE's in which FDLE's are considered current from 90 days to 6months or even a year, doing one every 90 days slows the process, is not effective and is costly. Local law enforcement checks 30 days prior to the adoption placement should be sufficient.
10 Hardee Highlands Polk	• It is recommended that the Appeal process becomes more of a priority to achieve permanency more timely. Also, recommended that subsidy continues for children who are 18 and are full-time high school students for at least 1 year to meet educational goals and to be more supportive of the family.
11 Miami-Dade	 Revise the adoption subsidy payment system to allow for adjustments to the subsidy both up and down to accommodate the needs of the adoptive family. Example: right now no consideration is give to the high cost of child care, particularly for children ages birth to five, which is covered through the Early Learning Coalition subsidizes until the adoption is finalized. Other states provide a higher subsidy for those years recognizing the tremendous expense this represents for adoptive families, particularly single parent adoptions. Once the child enters public school full time, the subsidy is reduced. Amend the Medicaid State Plan to allow payment for adoptive family counseling for the parents and other family members of children adopted through the dependency system. Funding for many of these initiatives that are common to several circuits would be best managed through grant writing and applications on the state level. Adoption subsidies should be extended past the 18th birthday if the student is actively attending high school until graduation or age 23. Adoption subsidies should continue with the adopted child and new guardian in the event of the death of the adoptive parent(s) without the requirement of a second adoption.
12	 Designation as a priority population for residential mental health services for adopted children.
DeSoto	 Extend assistance beyond 18th birthday to increase older teen adoptions
Manatee	• Increase funding for post-placement services for adoptive families
Sarasota	Review and revise Florida Statute to add additional safety nets and access to services for adoptive families
13 Hillsborough	• The committee's recommendation to be considered by the legislature is to require the courts to submit pertinent data for analysis by the DCF Program Office.
14 Bay Calhoun Gulf Holmes Jackson Washington	• To ensure accurate reporting of information related to actual adoption information specific to each Circuit a focus should be placed on data integrity and functioning in the Florida Safe Families Network System. To enhance adoption support a dedicated position should be developed within Circuit 14.
15 Palm Beach	 The only recommendation is to allow for adoption support services to be funded out of the Mental Health Services Wrap funds. The ability to use these funds for this purpose will be valuable in building a comprehensive adoption support system.
16 Monroe	 Revise the adoption subsidy payment system to allow for adjustments to the subsidy both up and down to accommodate the needs of the adoptive family. Example: right now no consideration is give to the high cost of child care, particularly for children ages birth to five, which is covered through the Early Learning Coalition subsidizes until the adoption is finalized. Other states provide a higher subsidy for those years recognizing the tremendous expense this represents for adoptive families, particularly single parent adoptions. Once the child enters public school full time, the subsidy is reduced. Amend the Medicaid State Plan to allow payment for adoptive family counseling for the parents and other family members of children adopted through the dependency system. Funding for many of these initiatives that are common to several circuits would be best managed through grant writing and applications on the state level.
	 Adoption subsidies should be extended past the 18th birthday if the student is actively attending high school until graduation or age 23. Adoption subsidies should continue with the adopted child and new guardian in the event of the death of the adoptive parent(s) without the requirement of a second adoption.
17	Much like the very successful 'Explore Adoption' initiative from the Governor's office, the State can consider
Broward	providing a statewide database that allows for meaningful analysis of responses to recruitment.
18 Brevard Seminole	• Pass language that allows Lead Agencies to carry forward retained earnings from one year to the next to ensure a consistent program. This also ensures state funds can be used to augment shortfalls in MAS funding.

Circuit	State Level and/or Legislative Action Recommendations from the Circuits
19 Indian River Martin St. Lucie Okeechobee	 A legislative action should be presented in reference to the Federal Government eliminating the AFDC calculation in determining adoption assistance. The Fostering Connections and Increasing Adoptions Act of 2008 began a gradual elimination of the AFDC link, beginning on October 1, 2009. By 2018, regardless of the child's birthparent's income, all children adopted from foster care who meet the special needs definitions will be IV-E eligible. Between now and 2018, eligibility will be phased in by age: At the Treasure Coast Legislative Summit held in 2009, it was discussed that following the first year of The Fostering Connections and Increasing Adoptions Act of 2008, a review of how it affected/benefited children in Circuit 19 could be conducted. A study entitled, "<i>Raising Cut-Off: The Empirical Case for Extending Adoption and Guardianship Subsidies from Age 18 to 21</i>" was conducted through the American University in an effort to discover whether differences in cutoff ages for federal support are likely to dis-incentivize permanency. It compared the number adoptions from foster care in the states that extend adoption subsidies to age 21 to the number of adoption in states that choose not to extend the subsidies and found that states that extend subsidies create more adoptions for foster children than states that do not. Based on the information provided, we believe that legislative action would provide additional incentive to adoption of older children.
20 Charlotte Collier Glades Hendry Lee	 Develop a network of providers who will give adoptive families preferential treatment and have knowledge specific to adoption related issues. Extended Medicaid benefits through the adoptive youths' 21st birthday. An adoption subsidy which is the same amount as the foster care board rate. Child care services (post finalization) for children up to school age. More service providers who accept Medicaid, specifically dental and orthodontic providers. Paid respite services for adoptive families.
